Germany Will Make No Concessions—Cecil Report Satisfies Committee

LEAGUE IS OPPOSED TO IDEA OF BARTERING

Spain May Be Given Control Over Tangier Zone as Compensation

By HUGH F. SPENDER By Special Cable GENEVA, Aug. 30-The problem of permanent seats on the Council

of the League of Nations which caused so much trouble last March will be considered by a special committee appointed for the purpose. Viscount Cecil and Dr. Leopold von Hösch had a final conversation here last night to discuss the League and how its de mand for a permanent seat could be squared with the Spanish claim for similar position on the Council. Germany still insists that no other ntering the League. There is no question of Germany making any ession regarding this, but once it has gained what it wants, it is to make a conciliatory gesture to Spain and to support any reasonable plan which will prevent Spain from taking up the same attitude as Brazil and giving notice of its intention to leave the League.

will accept what is known as the hand." Cecil report, which proposes the elec-Council members who would in ordinary course retire in three years' time to make room for the elec-tion of other states as members. Assembly may at any time make a declaration of its intention to reelect any or all of the retiring memers for another period of three ears, all the non-permanent members of the Council retiring in rota-

Acceptance of Cecil Report

This proposal, as The Christian Science Monitor representative has already pointed out, will probably be adopted by the Assembly for Spain and Poland, and also Brazil es it. Poland undoubtedly ild accept this solution of the

the original demand for a permanent seat on the Council of the League. It has been stated in mewspapers which are usually inspired by the foreign such percentage addition to be somethat the idea of any bartering in this matter is quite opposed to the League idea and that the two questions must ept absolutely separate.

This is all very well in theory, (Continued on Page 2, Column 3)

Kansas School Books Display American Flag

By the Associated Press Topeka, Kan., Aug. 30 VERY pupil in the public schools of Kansas will see the

American flag daily next winter.

The first page of each of the one million volumes published at the state printing plant this year will devoted to a picture of the flag. The picture appeared in several editions of state texts last year, but it will be found in every book this year. Insertion of a full-page repro-

duction of the flag in colors was suggested to the state printer by the Americanization committee of the Kansas American Legion.

BRITISH MINERS ARE WILLING TO DISCUSS WAGES

Negotiation for Peace — ate abolition of slavery. In matters

of the Nottinghamshire Miners' Aspower but itself shall be placed on sociation has passed a resolution an equality with the great powers favoring local negotiations for peace, "if nothing is done nationally this week toward a settlement." At the same time, the Miners' Federation representing 1,200,000 coal field workers throughout Great Britain who are on strike, has issued a manifesto declaring its willingness "to discuss the question of wages," provided it is "satisfied that the reconstruction of the industry on the There is no doubt the committee lines recommended by the Royal on the composition of the Council Commission is genuinely taken in

made at the moment when Parliament has reassembled to extend for to be preserved if the walkout should continue. The whole situation was District. discussed between the miners' executive committee and the Labor members of Parliament when a further endeavor was made to work out pracit might be possible for the miners' leaders to agree.

Objection to Longer Hours The schemes discussed The Christian Science Monitor representative understands are designed to get the night or dense the fog, no aviator round the miners' objection to longer equipped with radio, flying within 150 hours which the mine owners deon a permanent seat, but Spain will mand. One scheme for example would Los Angeles will have completed its on a permanent seat, but Spain will require something more than this, and its sudden demand for the control of Tangler and the threat to leave Morocco if it does not obtain it is undoubtedly connected with its insistence of a permanent seat at Geneva.

Idea of Bartering Opposed

mand. One scheme for example would reduce the working week to five days, thereby enabling longer spells at the coal face to be compensated by two thereby enabling longer spells at the coal face to be compensated by two this is undoubtedly connected with its other proposal is to maintain a national system of wages settlement, to which the trade union movement to which the trade union movement attaches the utmost importance for Spain does not admit it, but it is assumed if it could get satisfaction regarding Tangier it would be inclined to accept something less than the original demand for a permanent attaches the utmost importance, for reasons of its own protection, while affording also local flexibility in dead reckoning, he may get his potential to meet varying district conditions. It is hoped to effect this by providing for variable wages, arattaches the utmost importance, for even though the ground itself be out

Maharaja of Nepal Puts End to Slavery in His Dominions

Emancipation Effected of 57,889 Slaves After Strenuous Labor on Part of Government

By Special Cable

BOMBAY, Aug. 30-The last trace of slavery has been wiped out in Nepal, an independent state on the border of India with the emancination of 57,889 slaves, as a result of strenuous labor and great sacrifice on the part of the Maharaja's Government, says an official communiqué published at Katmandu, the capital. Certain anti-slavery laws were passed six years ago, but only two years back the most important steps toward abolition were taken, when the ruler issued a stirring appeal to his countrymen to end the evil practice. He soon followed the appear as slaves. The penalty fixed for the peal by the announcement of a gentransgression of the law was imous Government grant for this

humanitarian work. So successful was the Maharaja's omic arguments, that it soon Nottingham Workers Favor served to create a large volume of Optimistic Feeling Prevails compensation, the Government, instead of coercing the slave owners appears to have given thoughtful By Cable from Monitor Bureau | consideration to legitimate griev-LONDON, Aug. 30—The Council ances. MEXICAN RAIL LINE TO OPEN RICH FIELD

2,000,000 Pesos

Special from Monitor Bureau NEW YORK-The new railway line huahua City has been completed from Marquez to Muniz, and it is expected that the entire line will be ready for operation by the middle of 1927, according to officials of the commercial department of the Mexican Consulate-General here. The entire cost will be more than 2,000,000

The country traversed by the new railroad is rich in undeveloped stockraising and mineral resources, it was explained, since it is within this region that radioactive ores have been discovered during the last few

years. "The prospects of northeastern Chihuahua for cattle raising are excellent," an official who, until a few months ago, lived in Chihuahua City, says. "Before the Madero Revolution this Mexican state was the cattle 'hub' of the world. While it hardly may reach that peak again, the possibilities are still great. The modern tendency is toward quality rather

New Hampshire Slate Dry, Says Anti-Saloon League

Replies From the Candidates to Questionnaire Favor Amendment and Volstead Act

CONCORD, N. H., Aug. 30 (Spe- lican nomination for Governor, has cial)-All candidates for high offices been added to the list. In reply to in the primary election in New Hampshire on Sept. 7 are dry, says had come to New Hampshire to do.
the Anti-Saloon League which has "I have told everybody I have me made public answers it has received why I came to the State," he said. to the following questions:

"Will you work for the strengthening or the weakening of our prohibition laws? Will you, by personal example and by whatever influence you may have, work for the observance as well as the enforcement of

John G. Winant, incumbent candidate for re-election as Governor, answers to the second question, "I will," and to the first, "I shall continue to support a more effective enforcement of prohibition."

His opponent in the primary, Huntley N. Spaulding, chairman of the State Board of Education, says "I believe in prohibition and in Act without modification. I feel that my record will show that in the past, personal example and whatever influence I may have, I have worked for the observance and the enforcement of the law in question."

Eaton D. Sargent, Mayor Nashua, unopposed candidate for the Democratic nomination for Governor, says he is "thoroughly in favor of prohibition and stringent laws to make it effective," and that "I have never taken a drink of liquor in my entire life."

Georfe H. Moses, incumbent candidate for re-election and United States Senator, writes: "My answer to your questions is in the affirmative." His rival, Robert P. Bass, former Governor, says in part: "If elected to the United States Senate, my attitude toward prohibition in the future would be consistent with my position toward temperance and pro-

hibition in the past. I should work to strengthen the laws for the enment to the Federal Constitution." Judge James W. Remick concord, the third candidate for the Republican senatorial nomination, says that, "the Eighteenth Amendment and Volstead Act seek to safeguard America against its greatest curse. Thus spoke M. Clemenceau to a party of friends, led by Emile Buré, managing editor of the newspaper L'Avenir and formerly chief of the "Tiger's" Cabinet when the latter was Minister of Interior and Premier, 906-09. The interview is published by L'Avernir, M. Buré quoting M. Clemenceau direct.

Believe He Did Right Thing

The announcement came in reply to M. Buré's query as to how the war Premier appreciated the reaction to his world-wide open letter to President Coolidge. "Quite satisfied," replied M. Clémenceau. "I believe I did the right thing at the right moment. I have received tons of letters of approval from all the countries of the world, some signed by illustrious names, others by unknowns; many were not signed at all. There were letters from young and old, letters from women, letters from tradesmen, merchants, manufacturers, intellec-tuals, even from priests and clergymen, letters from all classes of society—except the parliamentarians of

"Many of these letters came from the United States. I specially treasure some from young Americans who enlisted in the French Foreign

Legion and fought under our flag.
"I expected to receive a formidable raking over from Americans. Well, no.—Nothing like that, no. no," the Tiger continued. Then his features relaxed and a quizzical smile lighted his rugged countenance as if he were greatly amused—"And Borah, Borah! Oh, that man Borah! I have not yet got over it. Yet you read what he Borah! flerce Borah! super-American Borah! No, really, I can't get over it."

Senator Borah's Statement

[Senator Borah, chairman of the United States Senate Foreign Afopen letter from M. Clemenceau, declared: "If they (the French) want to cancel their debts, let them in-clude all debts and all reparations, and show that benefit of the cancellation will go to humanity and to betterment of the masses of Europe, and not to the benefit of the imperialistic schemes which are now crushing the life out of people who were in no sense responsible for

M. Clemenceau continued: "You see, I had retired. I asked nothing silence and solitude. Then sudto be consummated; you will carry with you in the tomb responsibility for having permitted this to be done.' "Then I sat down and wrote my own letter. I left it open on my table for 24 hours. Finally I saw my duty

and gave out the letter. Might Send Another Letter

At this stage M. Clemenceau remarked that it was only his first letter, and that he might send an- ment entirely opposing the staple same result would be to hold an other one, and went on: "One Amer- standards. ican alone wrote me, complaining of my comparison of their treaty (with Germany) with the Brest-Litoysk treaty between Germany and

the letter is probably the one which shook them up most. But everything went all right. I do not believe that now ratification of the agreement can ever be possible as it stands.

"Never again will I re-enter active politics," the Tiger said in reply to a suggestion that he might seek election as Senator from Vendée.

"Senator! Senator!" he exclaimed over and over again. "You have not looked at me quite right, Senator! So that I would be forced to enlist i in a group and be guided by its policy, and perhaps be accused of political ambition in seeking the portfolio of the Ministry of Agriculture. No, nevermore. I am stronger now being nobody than I would as

These Questions Were Answered in Saturday's MONITOR

Minister, and, after all, what is the SPAIN'S CLAIM

Comment on Baker 'Views

Withheld at Washington WASHINGTON, Aug. 30 (A)-The opinion of Newton D. Baker, Secretary of War under President Wilson, that the United States should cancel lebts owed by its allied and associathe official circles of Washington.

were disinclined to comment except to call attention to the statement issued by the secretary prior to his departure. This statement, it was pointed out, was called forth by a plea for cancellation of the French obligation, which had been met by the Secretary's remark that "no other creditor of France has accorded such generous treatment" as has America.

Insert to consider this, since it claims to control the Tangler zone in order to prevent the smuggling of arms into Spanish Morocco, and indeed as the key to its possessions in Morocco, then it is thought that a mandate might be given to Span, under the League for the administration of Tangler. Great Britain is prepared to consider this, since it claims to control the Tangler zone in order to prevent the smuggling of arms into Spanish Morocco, and indeed as the key to its possessions in Morocco, then it is thought that a mandate might be given to Span, under the League for the administration of Tangler. Great Britain is prepared to consider this, since it claims to control the Tangler zone in order to prevent the smuggling of arms into Spanish Morocco, and indeed as the key to its possessions in Morocco, then it is thought that a mandate might be given to Span, under the League for the administration of Tangler. Great Britain is prepared to consider this, since it claims to control the Tangler zone in order to prevent the smuggling of arms into Spanish Morocco, and in order to prevent the smuggling of arms into Spanish Morocco, and in order to prevent the smuggling of arms into Spanish Morocco, and in order to prevent the smuggling of arms into Spanish Morocco, and in order to prevent the smuggling of arms into Spanish Morocco, and in order to prevent the smuggling of arms into Spanish Morocco, and in order to prevent the smuggling of arms into Spanish Morocco, and in order to prevent the smuggling of arms into Spanish Morocco, then it is claims to control the Tangler zone.

The arguments propounded by Mr. Baker, it was pointed out further, had been used repeatedly on the Senate floor during the debates on the various settlements and had twenty what Spain is going to do or whether the various settlements and had twenty what spain is going to do or whether the various settlements and had been used repeatedly on the settlements. failed to effect modification of the lit would accept as compensation the Italian and other debt agreements.

After reviewing the entire subject of debts owned by foreign powers and it. Yet you read what he all advances during the war, and -cancellation of the debts. France, in the Mellon-Derenger agreement, has undertaken only to repay the advances and obligations

equent to the armitice." Before his departure, it was recalled, the secretary, who is chair-man of the debt commission, had United States Senate Foreign Af-fairs Committee, in a recent state-had washed its hands of the French ment regarding his opinion of the debt when it signed the agreement with Ambassador Berenger, and that the matter now was entirely in the control of Congress, which had approved previous agreements entered into by the commission.

who have individually portrayed the new mode in millinery in felt, velvet, velours and hatter's plush.

And, in the very colors that Paris is wearing!

"Hats Made On the Head"

The whole new emphasis upon the importance of line makes it more and more a necessity to have one's hats made to order. Now, as in Paris, the smart woman may choose her favorite model, and have the hat reproduced on her head in the Wanamaker French Millinery Salon, and by a Parisienne, who has but just arrived from Paris. The prices of these custommade hats are surprisingly moderate, starting at \$22.50.

were reported:
"The steam shipping laid up in the principal maritime countries of the world on July 1, 1926, aggregated agout 6,086,000 gross tons, an increase of 4 per cent over the total on Jan. 1, but a decrease of 10 per cent from the same period of 1925.

2. Idle United States shipping in-creased by 363,000 tons, or almost 9 per cent, during the six months from January to July, 1926. Less Shipping Under Construction

3. Less shipping is now under nstruction throughout the world than at any time since 1909 and the amount in hand is lower by about 1,000,000 tons than the average for the twelve months immediately pre-ceding the World War.

4. There was a reduction of United States shipping of 565,000, tons, or per cent for the year ended June 30, 1926, as compared with the pre-

Conditions throughout the world on July 1, 1926, compared with those a year ago, were summarized as fol-

"Idle steam shipping was considerably less; full cargo freights in general were somewhat lower, shipping in existence was slightly greater, oversea trade appeared to be about the same in volume, ship-building declined, and there was no material change in the sale value of ships."

"An important development took place in the employment of privately owned American shipping during the past fiscal year, in that more than 500,000 gross tons of steamers and notor vessels were added to the active seagoing fleet. General cargo carriers represented the bulk of the addition, with relatively small increase in passenger ships and tank-

There was a decline, however, in the employment of Government-owned American shipping, which totaled somewhat less than 250,000 gross tons. Thus, the net increase in ctive American shipping on July 1, 1926, compared with a year earlier was around 250,000 gross tons.

United States Ranks Sixth The United States is now building 119,000 tons and ranks sixth among the shipbuilding countries of the world. Great Britain and Ireland Long Depression Seems to still hold the lead by a wide margin, having 838,000 tons on the ways. Italy follows, with 285,000 tons, France ranks third, with 154,000, The Netherlands fourth, with 148,000 tons, and Germany fifth, with 145,000

Dominions, 94,000 tons. or 4 per cent. No material changes took place in

After long negotiation, Greece has bania the population is divided among three faiths, the Orthodox, operative political action, which the Moslem and the Roman Catholic.) This event has made an unfavorable impression here, where it was hoped that the Albanian church would remain independent.

The representative of the ecu-menical Patriarch, the Metropolitan Trapezuntski, and the Albanian Government have signed an agreement the autonomy of the Albanian church under the following conditions: The Albanian Orthodox Church has five bishoprics, Coritza, Berat, Argyrokastro, Valona and Tirana. The Patriarch's representative will be both bishop of Tirana and the Albanian metropolitan. All the bishops are Greeks. The Greek language is being introduced into all the schools and churches, as in the time of the Turks. This is contrary to the resolutions of the Albanian Orthodox Congress held at Berat in 1922, according to which the Albanian language was proclaimed as the church and school language, and which has been followed hitherto.

Here it is felt that Greece has hur ried to settle this question in order that at the coming Pan-Orhtodox the Albanian Orthodox Church. Greek demands received the suppor of the Italian Minister to Albania.

LYNN MAYOR NOT SATISFIED WITH \$5 TAX CUT: WANTED MORE

Says It Should Have Been an Even \$26 Instead of \$30.80, but Finds Solace in Assessors' Saying It Would Be \$42 Under Anyone Else

LYNN, Mass., Aug. 30 (Special) — travagance is carried more by the humble people, in proportion to what they have, than anyone else. They are apt to think that because they Bauer, Mayor, whose efforts against municipal waste and extravagance have cut the tax rate \$5 to \$30.80, says he is ashamed of the showing explaining that he had hoped to reduce it more.

They do not realize that when business pays increased taxes that tax bill is marked up against the

a prudent and businesslike manage-mocracy can never be a success."
ment of the people's affairs. In Mr. Bauer criticized the Civil Serv ent of the people's affairs. In ment of a vast number of people who must be paid from the public treaspolitical loafers. ury whether they do anything to

appointment he knows it is practicalimpossible to divide the responsibility between the 11 men to whom he owes the job.

Therefore, he becomes responsible to no one and when his exenses for the year are once approved by the mayor, as a total amount under the budget plan, he can spend it as he sees fit and the mayor, although the financial manager of the city, has no right at all to go over the records of expenses as they oc-cur and check up and throw out those that may not be for the public

"Neither has he the right to check over the pay roll of the different employees and determine whether they produce anything for the public welfare in exchange for the pay they re-

ceive from the public treasury.
"Because of these political handicaps in any city in Massachusetts, nothing like a 100 per cent prudent and businesslike management of the people's affairs can be given," he went on, "and until these conditions are changed the taxpayer and the humble people who do not pay taxes directly will be compelled to carry ever-increasing burdens. Waste, extravagance, unnecessary expenditures and graft will grow until the people can no longer even stagger under the load unless some effort is made to change these charter restrictions and ordinance restrictions that prevent prudent and economical

administration of public affairs."

Referring to the increase of \$5.10 in Boston's tax rate for this year, notwithstanding the \$142,000,000 assessed on new valuation, Mr. Bauer shook his head and said, "I consider a tax rate in Boston of over \$25 a public steal that should not be permitted from any view-point. A \$25 rate would give all the public improvements that the city deserves and then some, but would not provide for hundreds on the pay ident.
roll who do nothing in exchange for He

when his term of office expires in 1928, he said that it is his intention to appeal to the representative men community to make plans to provide a solution that will preclude the possibility of political grafting.

"The whole thing is an educational proposition," he said. "We must edicate the people to understand that the burden of this waste and ex- Aug. 1.

Harold D. Wilson, Formerly nation. State Dry Chief, Favors Incumbent's Candidacy

judgment and proved devotion to its business interests," Harold D. Wilson, former prohibition enforcement officer for Massachusetts, yesterday announced a decision to support the incumbent instead of becoming an

independent candidate against him. The statement follows: "In order to clear the atmosphere regarding my alleged independent candidacy for United States Senator and sundry other offices, I am pleased to state that I am not a candidate for anything except the continued goodwill of my friends. "I am satisfied that the prohibit

has been taken out of prohibition in many quarters because of the moneyworshipping enforcement - shunting responsibility lies directly with the Administration.

"On the other hand, I am well aware that the wet and dry problem is not the only issue confronting the electorate in our extremely important Senatorial campaign this fall. As ardently as I believe in vigorous, impartial law enforcement, and as sgusted as I am with certain phases of the present do-as-little-as-possible policy, I do not believe that this is the time to rock the boat.

My advice to those who have followed me in the past, and who I trust stNl believe in the sincerity of my motives, is to get in step with the organization and put Butler over the top. This is no time for a onetrack mind. Let's play the game by Questions Why \$5,000,000 being regular when other issues seem to overbalance our pet hobby, and at a more opportune time press HARTFORD, Conn., Aug. 30 (P) our demand for fewer promise more action, for less explaining and Investigations conducted here over a more actual convictions. period of several weeks by Takee

HANDS OFF POLICY

IN MEXICO UPHELD

Patriotic Society Federation Passes Resolution

The controversy between the Mex-

ican Government and the Roman

Catholic Church, contending that it

s purely a domestic affair and is not

concern of the people of the

United States, the Massachusetts

Federation of Patriotic Societies has

passed a resolution supporting the

"hands-off policy" of President Coo-

lidge and Frank B. Kellogg, Secre-

Council of this Federation, in monthly meeting assembled, repre-

senting and speaking for upwards of 214,000 registered voters in this Commonwealth, do unhesitatingly pledge our steadfast support to President Coolidge and the Secretary

of State, Mr. Kellogg, in all meas

ures which they may deem wise to take for the protection of American citizens and the feferse of their fundamental rights when living

within the jurisdiction of the Gov

"Further resolved, That this State

Council respectfully advise Presi-

dent Coolidge and Mr. Kellogg, our Secretary of State, that we consider

the controversy between the Church and State in Mexico as a purely do-

mestic problem, and that it is none of the business of the people, or of the Government of the United States,

to interfere, either by uninvited gratuitous advice on the one hand,

or by official action by our Govern-

ment on the other, and that it ill

befits any loyal American to try to

stampede our Government into ag-gressive action at this critical pe-

riod, in the affairs of our neighbor

and sister Nation—the Republic of

sings with the Metropolitan Opera Company. But Mr. Brown's own estimate of the number whose paths to the realization of ultimate ambition he has made more direct will remain far short of the number hazarded by every country hotel requires a dance movement and increased safety. band nowadays. He will speak of students who come to the Conservatory as those learning a trade.

helping students to help themselves. The Conservatory has had some veterans as special students, too. Four men last year and two girls.

Mr. Brown speaks with rarest frugality of his work for the Conservaory. Perhaps because, for one thing, it needs no individual to speak for it. Its policy was conceived in ultraconservatism and when the years have tended to induce new liberalities, it has remained conservative. Once it was counted the largest such school in the United States. And. considering the character of the student body it has come to attract, perhaps the Conservatory is more characteristically a trade school than ever.

It is possible to remember Amy Lowell's explicit conviction that a poet had to learn his trade as a carpenter learns his, and to feel no jar. thus, at hearing Mr. Brown associate Lincoln Street, where he comes to the term with another of the arts. Mr. Brown is vice-president of the United Shoe Machinery Company.

> LIQUOR SEIZED IN SALISBURY SALISBURY, Mass., Aug. 30 (Special)-Forty members of the Massachusetts State Police Patrol from the Framingham, Middleboro and Holden barracks, seized much liquor at many hotels and cottages in Salisbury Saturday. The 17 persons arrested were taken to the Amesbury jail to await that motorists generally will weltrial on Sept. 8. The campaingn was led by Lieut, Harold D. Williams of the Framingham barracks. Lieut. Richard J. Griffin, state police detective of Haverhill, made the investi gation which resulted in the arrests.

TURNPIKE GETS

Newburyport Traffic to Be Expedited by Side-Road Stop Signs

The "through highway" plan, with "stop" signs guarding each "Scholarships are good," he will crossroad intersection, will be in-say. "Settlement schools, for in-augurated in about two weeks on travel lanes, authorized by the last Massachusetts Legislature, according to an announcement made by Arthur W. Dean, chief engineer of the State Department of public Works.
The "stop" signs, which are being

erected along the turnpike, innovation in New England, though the system has been in successful use in western states for a few years, not only on inter-city highways, but to an even greater extent on city boulevards. In Maryland, Michigan and other states the plan friends. Mr. Brown is pleased that is reported to have expedited traffic Vehicles approaching the through

warned by an octagonal sign reading. He believes the amazing demand for bands of all sizes is a happy circumstance whose best and most permanent effect is to be found in will be in black on a yellow back-"Through way, STOP before enterground. In addition a white stripe will be painted across hard surface roads opposite the sign. The state law requires that cars come to a complete stop at these intersections

Ever since the law was passed giving the driver coming in from the right the right of way it has slowed up the fast increasing traffic. By the new regulation the volume of traffic on the main highway will be speeded up and the hazard of a masmall side street will be minimized.

Massachusetts highway officials chose the Newburyport Turnpike betraffic, and its proximity to Boston for observation of the working out of the system. It will be a through way from a point near Malden to the outskirts of Newburyport. The effectiveness of the plan at the more heavily traveled crossroads will be put under observation for a time to determine if modifications will be necessary to avoid congestion. It is possible that automatic electric signals may be installed at intersections like that of the Lawrence-Salem highway.

State police officers will have instructions to enforce the "stop" regulations along the boulevard, but for the present at least no extra police will be detailed to this work. The commissioners of public works feel come the plan as a move to expedite travel, and will co-operate.

PAID INFORMERS MEET APPROVAL OF DRY FORCES

"Under-Cover" Man Wins Pay, but Woman He Hired Cannot Collect

Special from Monitor Bureau WASHINGTON, Aug. 30-That the use of "informers," as aides to prohibition agents in apprehending law violators has met with the approval of the controller general is shown by a recent decision that prohibition agents in enlisting the services of "under-cover" men could be reim-bursed for their work from the Treasury of the United States.

The case in which the decision was given by J. R. McCarl, Controller-General of the United States, arose in the Denver prohibition district, and involved the expense account of

Rejects Payments to Woman In ruling on the expense account, however, Mr. McCarl rejected the item in which the claimant sought reimbursement for funds paid to a woman who was employed to aid the of law violation. He also rejected an perienced following on the Napocepted and would be paid from the

Treasury.

According to the statement of the case that appeared in the Controllerrequested an allowance of \$82.50, rep-Gsneral's ruling, Horace E. Harden resenting expenses he incurred as an informer for the Bureau of Internal Revenue." His original claim for this amount had been rejected on the ground that he had performed volun-

Mr. Harden asked for a review, however, denying that he was a voluntary worker and saying he was employed by the federal prohibition director of Colorado with the express he might expend for the purchase of liquor as evidence.

street car fares, \$2.05, lodging, \$7, meals and other expenses, \$20.50, purchase of evidence, \$27.75, and \$25 reimburse Marian Butler for information given by her at various times. In connection with this last item, the Denver administrator said, "It was necessary for Mr. Harden to take a companion with him in order to make the buys. Mr. Harden also obtained part of his information from Marian

Purchaser of Evidence

In reference to the item for the purchase of evidence, Mr. McCarl said, "With respect to item four, the ordinary procedure is for prohibition agents working in conjunction with informers to procure and pay for the evidence pecessary to show a violation of the prohibition law. It is shown in the present instance, how-ever, that the informer procured and the association is one applicable to boys from the British public schools. known at this place and it would have been impossible to procure such evidence unless through the claimant. Under the circumstances the claimant may be properly reimbursed for the expense incurred for the pur-chase of whisky."

and 140 acres of irrigated land, as well as 1000 acres of veldt. After a

the Controller-General said:
"It has been held that the appropriations made for the enforcement of the National Prohibition Law does not authorize expenditures by way of entertaining friends, etc., as distinmished from dining or supper. The facts in the present case fail to show that claimant was authorized under his employment as informer to engage at the expense of the

m at the services of an assistant or woman companion, and such authority as may have been given him could not empower him to engage another to obtain the information or evidence which he had been engaged

TESTS OF SCREWS TO AID INDUSTRY

Government Tried 10,000 in Various Woods in Research

Special from Monitor Bureau WASHINGTON, Aug. 27-Answering a call that data on screws was urgently needed by industries, the Bureau of Standards has just completed a test, in which they experimented with the holding power of 10,000 screws driven into more than

seven different kinds of wood. The Bureau used specially equipped testing machines which pulled the screws from their settings and measured their holding power during the process. The repower during the process. The re-sults of the test, it is thought, will make possible better designs, stronger holding power, cheaper manufacture and wiser choice of cer-

tain screws for particular uses.

Manufacturers of screws have been Manufacturers of screws have been informed by experts at the Standards Bureau that the holding power of their products can be increased and the cost of making them reduced by leaving them rough and unpolished. The effect of the design upon the gripping power also has been described.

described.

It was found that when holding power is important the user should select the rough screws, with thin sharp threads, full diameter under the head, and with a shallow slot. Screws set across the grain were ound to hold a third better than when parallel to the grain of the

item of living expenses. But in not leonic wars, some 3500 British people apartment is taken by the city sole rejecting the account entirely, it was ruled that informers would be acthe British Isles and emigrated to South Africa. They were the anceshomes in South Africa. Details of the organization were given to a representative of The Christian Science Monitor by Col. M. M. Hartigan, who looks after the work of the association in London

The aims of the association, said director of Colorado with the express understanding that he would receive his expenses and any amounts which he might expend for the purchase of to go out and get information on the spot before embarking any capital. It is prepared to assist married men with a minimum capital of £2000 and single men with £1500. An accepted man gets a reduced fare on the steamer, a course of free train-ing under a farmer of repute for from one to two years, and advice on land purchase and farm establishment. The farmer, in return for services, is asked to give the settler free board, lodging and soft laundry and practical experience.

Farmers With Capital There are other categories which include trained farmers with a certain amount of capital; those with guaranteed employment, and selected persons with assured incomes who wish to settle in South Africa. Since its inception in 1920, the association

has dealt with over 1500 settlers with These boys are offered three years' free training and the first of four contemplated farms has already been opened at Tarka Bridge near Cradock in Cape Province. This farm has accommodation for 30 students The item for lodging was rejected because such expenses are not allowed to those engaged in civil work while performing services at their post of duty. As to the \$25, which branch of farming which they have and in the management of native

Boys to Have £ 1000

A boy has to be between 17 and 20 years of age and a sum of £1000 must be guaranteed to be available when he is ready to start on his own account. Of this a sum of £50 has to be deposited to pay his way home in case a boy should decide not to stop in the country. For the first year £5 a month has to be paid for board and lodging. Colonel Hartigan, who has lived

in South Africa for many years, is of opinion that the country offers unrivaled opportunities to settlers with some capital. Good land is obtain-able very cheaply as compared with that in some of the other dominions; labor is reasonable and plentiful substantial help can be obtained from the Union Government, which will advance a promising settler up to nine-tenths of a farm's purchase price repayable over 40 years at 4
per cent. This means that a man
can test a 1000-acre farm at about
£60 a year for interest and purchase. And the 1820 Association is

The corner stone has just been a kindergarten are provided in the laid for the block of apartment apartment blocks wherever it has houses concluding the scheme proposed in 1923 to supply the working classes living in wretched conditions are a year ahead of schedule, sinc the twenty-five thousandth apartment will be occupied as early as Descendants of Pioneers in South Africa Training an additional 5000 dwellings.

What is extremely interesting is that these buildings have been entirely paid for out of special taxes raised by the city, the sum (\$50,-000,000 in all) representing roughly informer in gaining admission to a LONDON—Just over a century one-quarter of the municipal budget house whose tenants were suspected ago, owing to the hard times extion. The rent now charged, which averages only \$1.25 a month per

City Controls Own Taxes

This unusual situation is explained tors of some 150,000 South African by the fact that when the Austrocitizens of today and are known as Hungarian monarchy collapsed in "the 1820 Settlers." A hundred years 1918 and the Republic of Austria later, in 1920, an association was emerged, the Socialists (Social Demformed to perpetuate the memory of those 1820 pioneers and to assist the right type of settler to make their arate province of this federal state possessing sovereign and unassailable powers, particularly over its financial affairs. This has permitted the city to do what it liked with taxation and to spend its large income as it wished. The result has dry in each block. Here every modern convenience of washing and dryin placed at the housewives conman has been heavily taxed in all manner of ways to pay for the otherwise excellent Socialist undertakings to benefit what has been termed the The apartments visited of two to

Raising of rents within the city after the war was restricted by a Socialist law. This has led to many hundreds of thousands of citizens ob taining their livelihood by subletting rooms, their own rent for their apart-ments reckoned in depreciated currency of the crown being only a few dollars a year. The apartment house

being made, consistent with the moment, to lead the people toward pro-hibition. Indeed, one of the strongest planks of the Social Democratic platform is their emphasis on so-briety, which the leaders demand of the working classes. This is made

Sesquicentennial Tablets Are Unveiled in Brooklyn

Special from Monitor Bureau NEW YORK, Aug. 28-Celebraiens on the sites in Brooklyn from which General Washington watched the Battle of Long Island and where much of the skirmishing actually took place, marked the sesquicentenni : today of the battle between the Colonial troops under Washington and the British under Sir William Howe and which continued from

Aug. 26 to 29, 1776. The battle, in which 20,000 British and Hessian troops were engaged against 8000 Americans, marked one of the closest escapes the American army had from capture. A movemen by Howe to cut off the retreat of the Colonials by throwing troops in their rear missed succeeding chiefly and a night digging in and thus gave Washington time to carry out his famous retreat in the night across

the East river to Manhattan.

A bronze tablet was erected on the spot at Court Street and Atlantic Avenue from which Washington watched the fighting, Rear Admiral Charles P. Plunkett, commander of the New York Navy Yard, delivering the address. Other exercises were held at Lefferts mansion in Pros-pect Park, where some of the skirmishing occurred.

BUFFALO HERD INCREASES

Knights of the Round Table Seek to Restore Legionary Fortress stood on the wrong side of the ledger. The merchant soon thereafter was called out of town for a few days and when he returned it occurred to him

Seattle Branch Initiates Move to Raise Fund for Excavations at Caerleon, England, Where King Arthur and His Men Met

SEATTLE, Wash. (Special Corre- addition to the American and Canspondence)—A campaign to raise adian Round Table," said Mr. Carfunds to help excavate the old Ro-keek, "there is an English Round man fortress at Caerleon, in England, the supposed site where King Arthur and his Knights of the Round Table week since its founding, and for 100 week since its founding, and for 100 and his Knights of the Round Table met, has been started by the Seattle Table of the International Knights of the Round Table.

that have been organized in the United States and Canada.

Further action probably will be taken at the forthcoming third international convention of the Knights of the Round Table International, to be held in Toledo, O., Sept. 15 to 18, inclusive. It is probable that the American and Canadian Tables will raise the fund needed by the Caer-

Presented Site to England

The story of the action contemplated began when one of the Seattle Knights, and the historian of the Seattle Table, Vivian M. Carkeek. read an article in The Christian Science Monitor stating that the London Daily Mail had bought the site of the amphitheater at Caerleon. England, and presented it to the British Nation, but that funds were needed to excavate the fortress. Mr. Carkeek wrote the London

Daily Mail and asked what the Knights of the Round Table in this country could do. He received re-plies from the editor-in-chief of the Daily Mail and from Dr. R. E. M. Wheeler, director of the National University of Wales in Cardiff, and president of the Caerleon excavation committee. Both writers expressed themselves as deeply appreciative of the interest and its promise of the further cementing of the tie binding the two countries closer: Task a Big One

Dr. Wheeler in his letter said:
"The task before us is a big one Within the legionary fortress about 20 acres are still available for excavation, and outside the walls at least a similar area is known to conand history of a Roman legionary

popular name of which still associates it with the Arthurian romances. The editor of the Daily Mail, with a keen appreciation both of our hour in this wood, and one day he needs and of the best means of conceived the idea of sharing all of arousing popular interest in them. this natural beauty with the residents chase of this site. The ancient structure remains, however, covered by many hundreds of tons of earth, and preclated by the public to whom it all fallen limbs. A home-made merrynow belongs, this earth must be moved under skilled supervision. Among the tasks which now await

provide funds for the excavation of King Arthur's Round Table, they would be giving a dramatic lead to public opinion in this country; not deed, action of this kind would appreciate it enough to reinforce the action of the Daily Mail in stirring up the British public to an adequate appreciation of this great center of history and legend."

American Member Named

Dr. Wheeler asked the internal member Named

Dr. Wheeler aske

Dr. Wheeler asked the international order to name a member to act upon the committee in England having charge of raising funds, and the international officers have nominated Mr. Carkeek. Mr. Carkeek will attend the convention at Toledo as a delegate from the Seattle Table.

"The order known as the Knights of the Round Table is an international club," said Mr. Carkeek, in discussing the Caerleon proposition with a Monitor representative. "It was formed at Oakland, Calif., March 20, 1922. It is the only organization of the kind having a literary and legendary background and setting. The membership of each Table is limited to 128 members, the supposed number of King Arthur's knights

sitting about the original table. King Arthur of the famous sword, Excalibur, from where it had been

embedded in solid rock.

"Each Round Table is supposed to render some specific service. One Round Table that I know reclaims drug addicts. Another looks after deserving boys. Still another takes care of the schooling of deserving

FAIR PROTECTION FOR FARM ASKED

Equal Share With Industry in Special Privileges Advised by Educator

By the Associated Press DES MOINES, Ia., Aug. 30-Legisferred the question with their in-dorsement to the 50 Round Tables that have been organized in the This name was later corrupted to lation that will permit the American farmer to enjoy as great protection at the hands of the Government as at the hands of the Government as is enjoyed by other industries is the greatest need of the United States, Charles W. Pugsley, president of South Dakota State College of Agriculture and Mechanical Arts, de-clared in an address before the Iowa Farm Bureau Federation at the Iowa State Fair.

Such legislation, Dr. Pugsley declared, would mean enactment of new laws permitting effective help in caring for farm crop surpluses. He explained that it might take the form of export equalization fee or of

bounty or bonus on exports.
"If these plans fail," said Dr. Pugsley, "it may be necessary to destroy the protection which industry and rers enjoy if agriculture is to

hold its own. Dr. Pugsley said he expected to be severely criticized for his statements on farm relief, but he felt secure in the belief that the Government itself has weakened its position on relief for the farmer when it admittedly helped every other kind of industry including the railroads. He asserted that if the Government had not virtually subsidized such other industries. it might now have some valid excuse for its failure to help agriculture.

Centering of Wealth

The Nation, the speaker said, should adopt policies which will return to the agriculture areas more of the wealth which has been centered in Eastern industrial cities.

"Chicago does not belong to Il-linois," Dr. Pugsley said. "A large group of states in the central West builded Chicago. Yet Illinois is the only State with the power to tax Chicago. Detroit was not builded by Michigan. Every automobile owner, or most of them aided to build De-troit. The Twin Cities (St. Paul and Minneapolis) belong to the wheat producing states of the northwest and New York belongs to the Nation. There is only one way in which

Art News and Comment

"ON WINTERED HEIGHTS," BY GUY WIGGINS

By FRANK RUTTER
Louden

By FRANK RUTTER
Louden

Much interest has been aroused in art circles by the issue this week of the report of the Royal Fine Art Commission which contains some much-needed home truths concerning the public mountered by the circle and the figure should be erected best to be rected in a public place-within the metropolitan district without the truths of the Commission of the Commissioners of orks, but since the war the autrities have been seriously embaraged by the multitude of a public words. the metropolitan district without the permission of the Commissioners of Works, but since the war the authorities have been seriously embarrassed by the multitude of applications to provide sites for memorials. The commissioners practically have been compelled to grant sites for monuments to various forces of the Crown and at the same time they have had little or no control over the have had little or no control over the actual design of these monuments, the cost of which has usually been defrayed by private donors and subscribers and not by the Exchequer.

Two years are the Exchequer. placed temporarily in the Great Hall of the Law. Courts.

Two years ago the Royal Fine Art Commission was set up as an advisory body which, it was hoped, might exercise a restraining hand without hurting the susceptibilities of these who generously offered to provide public monuments. Lord Crawford is chairman of the commission, which also includes among its members the architects Sir Reginald Blomfield and Sir Edwin Lutyens, Sir George Frampton, sculptor, Sir D. Y. Cameron, painter, and D. S. MacColl, art

In the report just issued the com mission states plainly that the best sites available in the central areas of London are now well-nigh exhaust-ed, and continues, firmly but po-litely, to say it is "felt inadvisable to multiply statues in the London parks." This pronouncement has en warmly welcomed alike by artists and the general public, both of whom are apt to derive more enjoy-ment from the trees, grass and flow-ers of these public spaces than from monuments of doubtful beauty in marble, stone or bronze.

When the commission was set up sitate swee. n t was hoped that much bad building sale removals. it was hoped that much bad building and bad sculpture might be avoided and bad sculpture might be avoided art journal conducted an inquiry as to "Which is the ugliest statue in to "Which is the ugliest statue in the ensuing correerection of a memorial would consult to "Which is the ugliest statue in the commission as a preliminary, and in this respect it has already had a beneficial influence not only in London?" and the ensuing correspondence proved how ample was the material and how embarrassing the choice. Bernard Shaw, while evading a direct answer to the question, then of looking gift-horses closely in the drew attention to the monstrous mouth, the commission now makes no "guying" of which Queen Victoria mouth, the commission now makes no secret of the fact that, so far as London is concerned, further gifts will occasion grave embarrassment. London is already overpopulated with the second of the monstrough of the fact that, so far as London is concerned, further gifts will occasion grave embarrassment. London is already overpopulated with the feminine fiction of her tathes.

Further, common sense indicates Mrs. Prig, Mrs. Proudie and make a that if a work of art be worth look- composite statue of them, and you ingeat seriously, it deserves a posi- will have a typical memorial of tion in which it may be studied quiet- Queen Victoria. ly in detail. For this reason the com-mission is not 'n favor of erecting can realism which disdained countly monuments in crowded thorough-fares. Its policy in this respect is shown by the line it has taken re-sarding the Blackstone Memorial. garding the Blackstone Memorial. When a United States committee of mahner and a beautiful speaking

harmonies of mountain coloring that have appealed to the different painters. "Mountain Forms," by Victor Southwest.

OXFORD BIBLES

Easy to read

BEGINNING with the first edition, supervised and executed that all Oxford printed in 1675, legibility has been a distinguishing feature of Oxford Bibles. This is due to the care exercised by the Oxford University Press in adopting particular styles of type only after careful experiment as to their readability, and the use of new and perfect types.

A notable advance in printing was initiated by the Oxford University Press when black-faced type was first used in Oxford Bibles. The use of this beautifully clear type makes it as easy to read a small Oxford Bible as another Bible of much larger size. And in addition, the printing is so carefully

Bibles are letter perfect-absolutely accurate in text.

It is by the adherence to such high standards of craftsmanship that the Oxford University Press has established Oxford Bibles in such high esteem throughout the world. In beauty of bindings, in durability and in convenient size they satisfy every desire.

Sold in Reading Rooms

Below are listed six Oxford Bibles (King James Authorized Version) sold in all Reading Rooms. And remember, they cost you no more because they are Oxford Bibles.

02723—Self-pronouncing, long primer type, cyclopedic helps, illustrated, 15 maps, divinity circuit. French morococ; size 8½x6½x15% inches. \$5.50.

01483x—Black-faced brevier type, very distinct; genuine Oxford India paper; Persian morocco; size 6½x4½x1 inches. \$7.50.

02483x—Persian morocco; similar in every way to 01483x except that it is printed on a lighter grade of India paper. \$5.00.

02200 - Long primer type, cloth cover; size \$x5\foralle{x}1\foralle{x} inches. \$3.50.

01440x—Self-pronouncing, genuine Oxford India paper, brevier type; Persian morocco; size 6½x4½x1 inches. \$5.00. 02561x—Extra large type; Oxford India paper; Persian morocco; size 71/2x61/4x13/6 inches. \$13.00.

"It's like a rainbow. See, it has led me to something good. Not exactly a pot of gold—but something good. Yes, very nice. And Ever-Ready began to have strange new feelings in his heart that Mule had never felt.

The first time that Ever-Ready was used in his new home he found that his harness had been made clean and shining, and the cart looked like new with a smart coat of Wasn't much grass, and ne driven gently nome and thinks with the field with Pollyann's plump, had jolly chit-chats under the shade of the hawthorn tree at the end of the field. Then catch up him so and the little gray donkey's call a donkey by such a name as the little gray donkey: very wise, and one day she said to

'Mule,' how can we expect him to "Ever-Ready, do you know that be anything but mulish? We'll call you are growing quite handsome? him 'Ever-Ready,' and he'll live up to Your coat is soft and glossy and it was a horrible mess when you came the dedication reads:

"Jeremy," said Pollyann, "you're quite right, and I am just going to donkey and a strong little cart to throw away that nasty hard stick shoulder and tossed his head happily. that's lying in the bottom of the cart. "I can't understand it," he said. "It isn't only my coat that has changed. I'm all happy and beautiful grew in the garden, and the eggs We'll drive Ever-Ready with some-And Jeremy and Pollyann nodded

in my heart too."
"Ah," said the old hen wisely, "it's ann walked to the town and found three donkeys for sale there. Two of them were much nicer-looking to match it. But now that it is full of willingness and kindness your coat has had to change to be like it."

"I think you're right," Ever-Ready agreed. "You see I'm just trying to ing uncle.
Robert Louis Stevenson delicated Robert Louis Stevenson delicated agreed." give Jeremy and Pollyann what they give me. I don't know what it is but his "Child's Garden of Verses," to his they drive me with it, and it is so nurse who took such good care of beautiful that it makes me want to him when he was a boy. Part of his run up the hills, and yet it makes dedication, which is in poetry reads: me feel so careful for the two old dears that I wouldn't shake them for

"Ah," said the old hen knowingly, the thing you are talking about is called love. It makes all the world beautiful."

Smiles and Frowns

Written for The Christian Science Monitor If I knew a box where smiles were

kept, No matter how large the key Or strong the bolt, I would try so T'would open I know for me.

Then over the land and sea broadcast
I'd scatter the smiles to play. That the children faces might hold them fast For many and many a day.

If I knew a box that was large enough
To hold all the frowns I meet, I would like to gather them every

From nursery, school and street Then folding and holding, I'd pack them in, And turning the monster key, I'd hire a whale to drop the box To the depths of the deep, deep sea. Maud Wyman.

Q. A man looking at a photograph exclaims:
"Brothers and sisters have I But this man's father is my father's son." Whose portrait was he looking

His son's.

Delightful Dedications in

one may often find some interesting things. Many boys and girls plunge at once into the story part of a book, forgetting that a book is neant to be enjoyed as a whole, from cover to cover.

Notice first the covers of the book with their bright or unusual decorations, and then the kind of paper and the style of printing used. Be sure to notice the author's name, and see it there is a list of other books by the

tions on the first pages are worth ter and the poem below the picture reading to give one a taste of the reads: feast which is coming. Some authors write a Preface, and as this is like a message from the author to the reader, it is too bad to miss it.

yellow paint. Very soon he begen In the middle of a white page all to live up to his name for he was ULE was a little gray don-key. He lived in a field outside the town where there wasn't much grass, and he worked very hard for a master who was bought, together with always ready at the gate for Jeren. The dictionary says that to widedication. The dictionary says that to widedicate is to inscribe by way of compliment, as a book, and a "dedication" is an address, as to a friend, but the place for a little gray dat the gate for Jeren. The dictionary says that to widedicate is to inscribe by way of compliment, as a book, and a "dedication" is an address, as to a friend, who was a little gray dath the gate for Jeren. The dictionary says that to live up to his name for he was always ready at the gate for Jeren. The dictionary says that to live up to In the middle of a white page all of what friend the author was think- Zeb and His Friends," by Edward ing when he wrote the few words "Pollyann," said Jeremy, "if we hen who was older than the rest and called a dedication. One feels better acquainted with the writer and with the book itself after reading the

dedication. For instance, in "Five Little Peppers Midway," by Margaret Sidney,

My Little Margaret Who is Phronsie Pepper to all Who Know Her.

When one is reading about Phronsle it is pleasant to know that she is like a real little girl.

There are dedications in the front of children's books to mothers and fathers, brothers and sisters, to little children, to friends, and to animals and end with the back cover so that and birds. In a big pile of children's you will not miss any of the good books there were no dedications to things between, and may have some uncles. Surely somewhere there must pleasant adventures am be a dedication to a jolly, story-tell-delightful dedications.

Take, nurse, the little book you hold And grant it, Heaven, that all who

May And as dear a nurse at need, And every child who lists my rhyme, In the bright, Areside, nursery clime, May hear it in as kind a voice As made my childish days rejoice! There are some beautiful dedica-

tions to mothers in children's books. One of these in "Knee-High to a Grasshopper," by Annie and Dillwyn Parrish, reads: "To Our Mother"
Not an unusual dedication but a

dedication to an unusual person. You would hardly expect a book to be dedicated to a chickadee, but in "Secrets of the Woods," by W. J. Long, he has used the Indian name for the cheerful little bird, and

To Ch'Geegee - lokh - sis, "Little Friend Ch'geegee" whose coming makes the winter glad. A book of bird stories by Edith M. Patch is dedicated to:

All other boys and girls throughou the land who are friendly to birds. Among the boys' books there is one dedicated to a baseball player, "who by example and teaching, has upheld the spirit of sportsmanship in professional baseball—" In "Water Bables," Charles Kings-ley has dedicated his book to:

My Youngest Son, Grenville Arthur To all other Good Little Boys. Come, read me my riddle, each good little men,

many interesting things, and the sound on the roof was just as musical. Nails, hammers and saws of all

N THE very first few pages of If you cannot read it, no grown-up a book, before the story begins, folk can. One of the "Sunbonnet Babies" books by Eulalie Grover has this for

Children's Books

Molly and May In bonnets so pink and so blue Who told me these wonderful stories,

Which I tell to you. Gene Stratton Porter has also written her dedication in poetry. In her book "Morning Face," there is a same author, because you might want small picture of a chubby-faced little to read some of them.

West Meets East in Yenching University's New Buildings Yenching plant have come from America and have been raised by individual subscriptions by interested

Peking, China Special Correspondence

RCHITECTS and artists generally are hailing the new buildings of Yenching (Peking) University as a successful synthesis of Oriental beauty of design with Western utility and durability. While this achievement may have been secured previously on a few individual buildings in Asia, this is doubtless

Even the most exacting critics among the Chinese themselves are agreeing with Occidental artists that the distinctive symmetry of traditional Chinese architecture has been preserved in reinforced concrete without secrificing any of the conveniences of modern building equipment. This consummation of a problem which has intrigued architecture. lem which has intrigued architects of a more convenient world. . . . and builders since Westerners first began coming to Asia is thus the chief element of interest in the trans-fer of Yenching University from its old temporary site in the southeast corner of Peking (Tartar city) to its new location four miles northwest of the Hsichihmen Gate in the northwest corner of the city wall.

An Unusual Privilege

It is not often that any collegiate institution has the privilege of erect- eaves, with strong red supporting ing a complete new campus at one pillars, with ornately patterned time and of occupying all the build- and painted rafters, with great exings simultaneously. Moreover, most of the 40-odd colleges and universities in China's capital are looking yet they are not Oriental at all. For forward to the time when they move whatever in a Chinese house would out of the political turmoil of Peking to some site in the Western Hills, that lovely range of mountains which struction supervisor, is responsible crowds down close to the walls of for much of the successful executhe city of Kulba Khan along the tion of the architect's designs. It was

in Peking, including the National Government University, already own such sites. Tsing Hua College, maintained by American Boxer Indemnity funds for the training of Chinese students to be sent to America, is only a half mile from the Yenching campus. There is thus growing up to the northwest of Peking a group of schools which should make that of schools which should make that section one of the great educational centers of the world. This will certainly be true if the National Juiversity succeeds in securing the Yuan Ming Yuan or "Old Summer Palace" just north of Yenching, which it is reported to be considering for its new site in preference to one it now owns farther out in to one it now owns farther out in the foothills of the mountains.

Summer Homes of Princes A mile west of Yenching is the Wan Shou Shan or "New Summer Palace," standing just as it was huilt by the Empress Dowager. Scattered about the countryside were the sum-

mer homes and gardens of princes and courtiers, with lakes, rockeries, picturesque pine trees, and all the nventional features of Chinese

site of more than 100 acres upon which have been erected 19 buildings, not including the faculty residences which are upon separate compounds.

The axis of the campus stretches from the Jade Fountain Pagoda, several miles on west of the New Summer Palace, to the university water tower on the east edge of the cam-

Chinese pagoda. Harmony of West and East Concerning the new buildings, the the first time that a complete group Far Eastern Review says: "A new in a suitable setting has been con- actor has come upon the stage; we find him in every walk of life. In

pus, itself disguised as an ancient

"The most conclusive proof of this contention can be seen at the new campus of Yenching University at Haitien, near Peking....There are large buildings, small buildings, lovely proportioned square buildings a tiny pavilion, a pagoda, all beautiful in the old Chinese style of curv-ing tiled roofs with animals chasing each other over the edge of the

panses of windows in small checkered squares....These Yenching buildings are convincingly Oriental, be wood, here is concrete."

The Elementary School and Business Needs

Birmingham, Eng. Special Correspondence IN ORDER to test the statements as to the practical results of education given in the elementary schools, the Birmingham Chamber of Commerce initiated an inquiry into the work of the schools of that city in its relationship to the requirements their aim the ultimate improvement of the education system in so far as improvement might be needed, the chamber sought the co-operation of educationists, and as a result the report is a joint one over the signatures of elected representatives of the chamber, the teaching profession and the city education authority.

As a preliminary step in the inquiry a questionnaire was issued to members of the Chamber of Commerce, replies to which were received from 141 firms, this number including almost all the very large manufacturing establishments, and wholesale and retail distributors. The report is a lengthy one, but the first

of each lesson, he would draw before

which he wanted them to develop in

their own way. This was displayed for not longer than five minutes,

then removed and thereafter kept out

of sight. The pupils were then in-structed to make up a similar study

of their own. In the case of a life model, they were warned that each

sketch would differ from every other

as the relative position of the sketcher to the sketched varied and

that in the case of decorative panels,

riezes, etc., their own and not imi-

tative ideas were most to be desired.

How eagerly they followed this advice is seen in the wide variety of

esults in the exhibit of best work.

Without detail, which the child easily lisregards, these examples still pos-

sess a quality of feeling for design

and color, which ranks them ahead

of more conventional work done by children much older and more ex-

fact that emerges is that the committee feel bound to record that in the case of a majority of employers standard reached in the "three R's." By this is meant that handwriting, spelling and mechanical arithmetic are not characterized by that neatess, accuracy and thoroughness which employers need. At the same time there is a consensus of opinion that after a short period of training in office or works the beginners usually prove satisfactory.

In justice to the elementary schools, there are, however, certain considerations on the other side to which the committee attach importance. In the first place, owing to the great increase in the number of free places in secondary schools in recent years, the elementary schools have lost a large proportion of their abler scholars to the secondary schools. Secondly, the fact mentioned above, namely the quickness with which the young people have learned their jobs, was stressed by the representatives of the schools as proof that, though the importance attached to mechanical proficiency was, yet the broader purposes of children have a greater command of their native tongue today than ever before, and modern methods of teaching have inculcated a greater love of reading, a higher appreciation of literature and a more intelligent knowledge of arithmetic.

The report conclusively disproves the more sensational of the com-plaints that are frequently leveled at the products of the elementary school as to efficiency. And in other directions it expresses satisfaction.
Praise is given by the committee on the strength of the replies of employers to the honesty, truthfulness and reliability of the young people. The conception of discipline has undergone a considerable change in the direction of freedom; and friendliness between teacher and child is noted in the report.

A valuable result of the inquiry. and this is noted in the report, has been the frank exchange of views between business men, teachers and administrators. The meetings of teachers and representatives of leading businesses in the course of the inquiry, the endeavor to realize each other's points of view, the realization of each other's difficulties and aims, have all been for the good. Some of the criticisms of the schools were shown to be due to ignorance of the actual work done, as, for instance, that French and shorthand were included in the ordinary elementary school curriculum. On the

Milwaukee, Wis. Special Correspondence ITH the close of the first season's experiment in Milwau-kee with voluntary Saturday art appreciation courses for children of the public schools, Alfred G. Pelikan, who conducted the program in addition to his work as director of art in the Milwaukee public schools, is able, partially at least, to sum up the results and benefits derived from

this project. "The purpose of the winter's work was threefold," declared Mr. Peli-To go further in art than the public school curriculum provides, with those children who are interested. To discover possible new tal-ent. And to educate a consumer public and foster a better under-standing and appreciation of art. While of course the last is not only the most practical for the limitations of such a project but of the greatest social value in the long run, we have nevertheless discovered several chil-dren whose work shows decided promise. We have followed the de-relopment of children who were most interested in their school art course and showed the most talent,

and have persuaded them to take ruction in art at the ar "In general, the work of the class is aimed at bringing out the creative sense and the feeling for color which is inherent in the average child," states Mr. Pelikan. "And the results, which fill the walls of one of the

largest galleries of the institute, tes-tify to the quality of that inherent SCHOOLS—United States Miss HARKER'S School for Girls

STOCKS SHOW A WAVERING PRICE TREND

Market Experiences a Very Irregular Movement-Atchison Up

NEW YORK, Aug. 80 (P)-An irregplarly higher price movement today ishered in the week preceding Labor Day in the stock market traditionally a period of quiet and indecisive trad-

a period of quiet and indecisive trading.

Rails were again in brisk demand under the leadership of Attrison, which opened with a block of 2000 shares at 153%, up 1%, and a new high record for all time.

General Asphalt and General Electric each opened about a point higher. The market wavered soon after the opening when bear selling was renewed against the motors and rubbers, early losses of 1 to 2 points being registered by Mack Trucks, General Motors, Hudson, and United States Rubber, with sympathetic declines of a point or more taking place in United States Steel common, American Smelting and Westinghouse Air Brake.

Reaction Is Checked

Lack of extensive public participation and the possibility of a further stiffening in call money rates because of the demand for funds in connection with third quarterly dividend, interest and Federal income tax payments are believed to have inspired the selling movement.

movement.
Special strength developed in Delaware & Hudson, which touched 177 for the first time since 1910. New peak prices for the year were registered by Owens Bottle, Butterick Publishing, and Amalgamated Leather.
With the exception of a drop of 8 points in Spanish peseias, foreign exchanges held steady in quiet trading. Active bidding for a number of the railroad equipment issues caused a suspension of short selling and realizing before midday.
Pullman, American Car & Foundry, Baldwin Locomotive and American Locomotive were lifted materially.
The renewal rate on call loans was maintained at 5 per cent.

Bonds Are Steady

Bonds Are Steady The bond market today was quiet but relatively steady, changes being with few exceptions confined to frac-

7s continued to reflect the % to a new high at 90% Pollsh 8s were

to a new high at 90% Polish 8s were also strong at ½ higher. Framerican 7½s and Belgian 6½s were heavy, the former showing a decline of three quarters, and the latter 5%.

Among the stronger industrials were Dominion Iron & Steel 5s which were up a full point, and American Writing Paper 6s and Morris & Co. 4½s, both of which were ½ higher. Losses ranging from ½ to ¾ were recorded for Skelly Oil 6½s. Granby Consolidated 7s, South Porto Rican Sugar 7s, International Paper 5s, South Colorado Power 6s and Remington Arms 6s.

United States Government on Arms 6s. United States Government issues were irregular

FALL RIVER CLOTH DEMAND BROAD AND

QUOTATIONS FIRM

FALL RIVER, Mass., Aug. 30 (Spe-FALL RIVER, Mass., Aug. 30 (Special)—Of the moderate business transacted last week in the local cloth market a fair proportion has been done at an advance in prices over those of the previous week, with the bulk of the trading being in spot goods, though some contract buying for deliveries running into December has been announced,

been announced.

More activity was noted in fine goods than has occurred in several weeks. Twills and sateens were the most active numbers, but on the whole business was well distributed over the entire range of constructions. Cloth buyers appeared to be skeptical in regard to the government's report of the condition of the cotton crop with the result that orders did with the result that orders did not begin to swarm in as was anticipated with the advance of cotton

pated with the advance of cotton prices.

The mills, however, took keen note of the advance in cotton and declined to enter into trades at former price quotations. Their surplus goods have been entirely sold during the extraordinarily good business of the last two months, and they are in a position to sit back and hold goods for better prices, a point that the buyers do not seem fully to realize as they have hitherto been frequently successful in forcing special prices whenever the mills were overstocked.

During the week free selling of the distriction and and the 83x48 reversed stripes sold repeatedly at 9%. For the first time in many months, cretonnes were in brisk request.

In the plain goods, 6% has been the ruling price for 60x48's, which is an advance of an eighth of a cent. Squares of 48s have brought 5% cents. 44x40s, 5 cents, and 52x40s, 5% cents.

Conspicuous advances noted in the harrower goods were in 36x32s and 28 x24s, which sold respectively at 3% and 2 13-16 cents.

Current prices on the standard constructions are: 33½in, 64x60s, 8c; 39, in, 65x52s, 4%c; 25in, 64x60s, 5%c; 27in, 56x52s, 4%c; 25in, 64x60s, 5%c; 27in, 56x52s, 4%c; 25in, 64x60s, 5%c; 27in, 56x52s, 4%c; 25in, 64x60s, 5%c; 27in, 56x44s, 2%c; 25in, 56x44s, 2%c; 27in, 56

Current prices on the standard constructions are: 38½in., 64x60s, 8c: 39, in., 56x44s, 6½c; 27in., 64x60s, 5½c; 27in., 56x52s, 4½c; 25in., 56x44s, 3%c; 37½in., 64x110 sateens, 11½c.

* LONDON STOCK MARKET QUIET

LONDON, Aug. 30—The stock market was again quiet today, being mainly occupied with the preparation for the fortnightly settlement.

Olls were firm, with Anglo Persian in demand and advancing on talk of larger dividends. Industrials were steady, with exception of Courtaulds with the was in supply.

Philean Mining was in demand. Some rails were steady. Rubber issues were quiet. Royal Dutch was 32½, Rio Tinto 42½ and Courtaulds 5 21-32.

The glit-edged division was steady foreign issues were easier on the deciding in French rentes.

DOWNWARD TURN IN WHEAT PRICES

CHICAGO, Aug. 30 (P)—Liberal receipts of wheat here with prospective good sized deliveries on September contracts tended to bring about lower wheat prices today during the early dealings. Besides favorable weather in the northwest led to predictions that hedging sales would commence in volume shortly.

Starting at %c decline to %c advance wheat underwent a moderate general setback. Corn and oats were easy, corn opening %c@%c down/and later fallying a little. Provisions advanced.

AMERICAN BLOWER Construction of the United States been declining, since Novement, and dioastions are that if may decrease during are that if may decrease and dioastions are that if may decrease and dioastions are that if may decrease for read feast remain fairly states for the states of the stat

BY PAN AMERICAN SMALLER EARNINGS

Pan American Petroleum & Transport Company, including owned and controlled companies, for the six months ended June 30 reports a consolidated net profit of \$15,335,616 after interest, depreciation, depletion, fedsolidated net profit of \$15,335,616 after interest, depreciation, depletion, federal taxes, etc., equal to \$5.56 a share on the average amount of comon outstanding during the period.

This compares with \$16,539,000 or \$6.02 a share on the common in the first half of 1925. No proportion of the profit of Lago Oil & Transport Corporation is included in the above figures.

figures.

Consolidated surplus as of June 30 was \$22,471,595, an increase of \$7,-113,115 during the six months.

CALIFORNIA OIL OUTPUT CALIFORNIA OIL OUTPUT

NEW YORK, Aug. 30 (P)—Crude oil
production in California for the week
ended Aug. 28 averaged about the same
as the week before, 610,000 barrels, despite a decline in the major pools of the
Los Angeles basin of about 3000 barrels. This was offset by a new gusher
of General Petroleum Corporation which
raised the average Ventura production
to 50,000 barrels.

NEW YORK STEAM CORPORATION NEW YORK STEAM CORPORATION

New York Steam Corporation for the
year ended June 30, 1926, reports a net
of \$659,911 after federal taxes, interest,
depreciation, etc., equivalent after preferred dividends to \$12.49 a share on
30,000 shares of no-par common, compared with \$353,511, or \$4.66 a share, in
the preceding year.

MALLINSON EARNINGS MALLINSON EARNINGS

H. R. Mallinson & Co., Inc., reports for the six months ended June 30, 1926, net loss of \$435,407 ater depreciation, interest, etc. Operating loss was, \$343,-216; depreciation, \$74,270; interest, etc., \$49,919; loss, \$467,405; other income, \$31,-998; net loss, \$435,407; preferred dividends, \$83,167; deficit, \$518,574.

STEEL WAGE PAYMENTS LARGER YOUNGSTOWN, Aug. 31—July wage disbursements by a district steel company totaled \$7,000,000, contrasted with a monthly average of \$5,000,000 for several years previously. This indicates improved summer activities in steel in the Midwest.

THIRD LIBERTY BONDS WASHINGTON, Aug. 33—In the first 25 days of August the Treasury purchased \$69,325,500 Third Liberty Loan bonds for the sinking fund, compared with \$21,700,000 in the similar period of 1925, and for the fiscal year to date \$94,-35,500, compared with \$31,700,000 a year ago.

VULCAN DETINNING GAIN Vulcan Definning Company net for the first half of 1926 rose to \$182,349 from \$131,748 in the first six months of 1925, equal to \$7.53 a share on the combined preferred stocks, compared with \$5.44 a share a year ago.

ATLANTIC COAST LINE ATLANTIC COAST LINE
Atlantic Coast Line Railroad reports a
halance of \$777.652 for July after taxes
compared with \$613,033 for July last year
and for the seven months' this year \$14,990,864 compared with \$13,795,576 in the
like period of 1925.

PHILADELPHIA, Aug. 30—Although
no plans for the reorganization of the
Music Master Corporation have been determined upon, it is believed some plan
can be worked out whereby all interests
can be benefited.

INDIAN REFINING CO. INDIAN REFINING CO.

Indian Refining Company, including subsidiaries, for the six months ended June 30, 1926, reports a profit of \$307,364 after interest and other charges, compared with \$455,135 after interest, depreciation, etc., in the first half of 1925.

LONDON QUOTATIONS LONDON, Aug. 30—Consols for money today were 55. De Beers 18½ and Rand Mines 3½. Money was 3% per cent: discount rates, short bills 42,04% per

FOOTWEAR AND LEATHER CALL QUITE ACTIVE

Shoe Booking Satisfactory -Prices Steady-Tanners Find Demand Good

The weekly forwardings of footwear have reached a peak beyond general expectations at the opening of the season. Late bookings of new business are satisfactory.

A close observer of events in the Boston she market reports that approximately 50 per cent more buyers of the department store type have visited the shoe district there this season than has been the case since 1920. Activity at the shoe plants varies but the average is good, with a steady receipt of small orders which will probably continue for several weeks yet. New samples for the spring trade have not yet been fully determined upon, but it is the opinion of many that modish footwear will not be radically different.

As is usual with an easy market, buyers are demanding lower rates than consistent with maintained quality, and it is reported that some of

han consistent with maintained qualty, and it is reported that some of
he heavier operators have succeeded
n breaking through the established
lst. The probabilities are, however,
hat prices will remain unchanged during the current season.

The leather markets have now the
lagger half of the fall demand behind
hem, manifesting no positive strength
t any time. Oak and union offal, also
he cheaper grades of upper leather,
have advanced a fraction now and
hen, as the demand reduced stocks to
minimum.

then, as the demand reduced stocks to a minimum.

The demand for oak sole leather is active but lots are running smaller as the season ebbs away. Bidding on sizable lots is occasional. There is an underlying strength in prices and though the sales of leather were rather small last week quotations on sole leather were very strong.

Selected oak backs, tanhery, run, remained unchanged at 42@44c, and ordinary tannages at 38@40c. Finders' choice bends sold at 65@78c. Overweights were active, some tanners asking an advance of 2c. Texas X bends were slow in movement but firm at 75c.

Oak Offal in Demand

Oak Offal in Demand

The call for oak offal continues active, with certain selections sold up. Tanners were not averse to notifying buyers that conditions might force a rise in prices, but the week closed with no marked changes. Choice lots of rough double shoulders sold, in carload lots, at 40c.

Single shoulders, same grade, brought 32-34c, No. 1 bellies were offered at 27-29c, with common tannages bringing from 1 to 2c less, The better heads sold at 16c.

Union sole leather was quite active all the week. The call for the heavier weights has been spotty, but for the medium and light weights, it has been steady and sizable. Packer steer backs, all weights, are listed at 42c. Tannery run of packer light steer backs are quoted at 41c. Cow backs, selected, are 41c. Choice union bends are offered at 53-54c.

Union offal is sold down to bare

54c.
Union offal is sold down to bare
ors, and prices are firm to higher
small lots. Shoulders are scarce at
a Bellies are firm at 24c when sold
carload lots. Heads are being booked

nt is noticed.

he light weights, intended for
es' footwear, are slow of sale, as
also the boarded novelty finishes.
dee selections of plump skins are
ted at 45@48c. The lighter
ghts, extra prime, are offered at
but a regular run is obtainable

at 40@44c.

An improving call for black coze calf is noticed, but that for colors is spotty. Top grades are listed at 50@ 54c, prime mediums at 44@48c, and a good third quality at \$5@40c.

Side Leather

The cheaper grades of side upper leather continue to monopolize the call. The better selections of black and colored chrome sides are listed at 28@30c. Mediums are fairly active at 24@26c. A third grade, varying in weight, gets the major part of the demand, selling steadily at 18@22c, with odd lots moving at 14@16c.

Embossed sides are still popular. Top grades sell at 30@32c. Cheaper grades are obtainable at 22@26c.

Tanners report that elk sides move slowly in the top selections, with the medium grade a little better and quoted at 25@28c. However, cheaper leather offered at 16@22c is easily marketed. Bark and combination tannages rule active in the lower grades, selling from 14 to 20c, but the better sort is quoted at 22@26c.

Tanners of splits report some improvement in the movement of split leather. Calfskin and side leather splits have had a fair demand throughout the current month.

Plump first quality leather brings 12-15c. The under grades, all weights, sell readily from 8 to 10c. Trading in flexible splits is, at times, brisk. The top grades, plump selection, are selling at 16-18c. Seconds, medium and light weights are quoted at 10-14c.

Sock lining splits are offered at a price range of 3 to 6c. Kip splits, medium weight, used in men's shoes, listed at 19-20c, have lately been in good demand.

New business for japanners keeps at a steady pace, with prospects of a good run well into the fall months. There may be no contract business, but the demand is steady.

Selected colored patent leather, though draggy, is firm at 44-42c. Prime seconds are quoted at 35-42c. Cheaper lots, varying in weight, are obtainable at 25-30c. A high grade colored Kip is offered at 50-55c. Top grades of Chrome sides are listed at 38-32c. There is still a lower grade which is available at 20-25c.

COMMODITY PRICE

Harvard Economic Service, commenting on movements of commodity prices, says:

"Contrary to the movement of general price indexes, the majority of our indexes of prices in particular industries advanced in July. This is not surprising, since the recent decline in average prices has been accounted for largely by live stock and its products and by certain fuels.

The indexes of finished steel, scrap, raw cotton, raw wool, silk, hides and skins, leather and paper advanced in July, but in no case was the advance sharp. Pig iron, cotton goods, wool goods and wood pulp declined, wool goods and silk prices have been approximately the same as at the end of July, while scrap, raw wool, cotton goods, and hides have averaged higher than last month and raw cotton, despite recent advances, has averaged lower." Harvard Economic Service, co

EVENTFUL WEEK France Qualifies IS SEEN AHEAD

Two Important Series for St. Louis-Chicago Is Closing In

Their first clash ending in a tie, how-ever, indicates the tenseness with which these games are to be played. The coming World Series is not likely to produce such equality as these two have to face each other with, each having won seven in their meetings so far, and, although their clashes should aid in determining the winner, the series may terminate in equal wins and losses, which would benefit the

won 10 our of 17 from Chichmatt, six out of 19 from St. Louis.

The New York Giants are rapidly sliding back and it appears that before another season comes around radical changes are likely to be made by Manager McGraw. His team is not only a disappointment but he is apparently foreseeing internal difficulties that are affecting the play of his team. The material is there, but it is not producing.

producing.

Brooklyn is rightfully down with the Braves and Philadelphia, all three playing far below the standard of the leaders. The first division teams are the only interest now and the last-place teams must await another sea-son to approach standard and atten-

DE PALMA WINS ALL

THREE AUTO EVENTS CHICAGO, Aug. 30 (P)—Ralph de Palma won all three events at the Hawthorne Oval yesterday, competing with Peter de Paola, Clifford Wood-bury and Thomas Alley, stars of the dirt and surfaced automobile racing

dirt and surfaced automobile racing tracks.

The 20-mile race was won by De Palm in 16m. 36 2-5s., with Woodbury second and De Paola third. Racing with Woodbury and De Paola in the time trials for one mile, De Palma led the way with the time of 74.22s.

In the first heat of a five-mile race De Palma defeated Thomas Alley, who was driving a front-drive special, an innovation in dirt track racing. In the finals De Palma led Woodbury, negotiating the distance in 4m. 50s.

De Palma's time for the one-mile trial, starting from a standstill, was a fraction over 8s. faster than his previous world's record, \$2.75s., made at Syracuse this year.

Officials on the A. A. A., who timed him yesterday, may allow the new record, it was said.

BIG FOUR" NOT APPROACHED NEW YORK, Aug. 30 (P)—Charles C Pyle, sports promoter, who has Suzann-englen, French tennis star, under con-ract to play a series of matches in th Lenglen, French tennis star, under contract to play a series of matches in the United States, has no "business arrangement" with any member of the American Dayls Cup team. Pyle's admission that he had not approached any member of the team was made here after William T. Tilden 2d, Vincent Richards, William M. Johnston and R. Norris Williams 2d, methbers of the team, had emphatically defied that they had any offer from Pyle under consideration.

PtsG. 2 5 4 4 5 4 6 - 30 - 6
Tawara 4 3 2 2 3 1 4 - 19 - 1 SECOND SET losses, which would benefit the priors because they are now in the Tawara 1 4 4 4 4 2 1 4 5—29—6 However, even though this series does not greatly enhance the chances of either one, there is another three-game series, starting Friday, between St. Louis and Cincinnati, the second-place team, which is merely another opportunity for one of the three contenders to make a decided advance. P. S.A. N. O. D.F.11 0 6 8 06 0 6 15 0

place team, which is merely another opportunity for one of the three contenders to make a decided advance. The Reds have been up and down from first to fourth place; but when the Cardinals and Pittsburgh were pacing each other day after day, the Reds also started a drive that is fast surpassing that of the other two and finally they overtook St. Louis and went into second.

The Cardinals and Pittsburgh are even in games played this season. Clincinnati, however, has won 11 of 18 games played against St. Louis and since the coming series will be played in Cincinnati, the Reds might be considered the favorites. just in time to prevent the tying game in the fourth set, which might have given Cochet the victory if ac-

sidered the favorites.

Just how much longer these three teams will speed along within a finger length of. each other is hard to estimate and picking the likely one to estimate and the likely one to be all where net play is a disadvantage. As in his victory over Lacoste, Harada and the matter whenever Cochet tried to obtain a forward position. The linesmen were tapidly becoming subject to the spell of hope. St. Louis fans; but they certainly see visions of that thrill this season.

The Chicago Cubs, not so far behind, are emulating the dash and speed of the leaders and yesterday's victory over Cincinnati, completed their eighth straight win. A continuance of this, particlarly against the leaders, and the Cubs might the limital set, only one going the likely of the victory of the limital that the star of the second and held the lead to 3—2, the second and third.

T

however, a streak of wildness overcame the Japanese and with Cochet
using his net position to make placements, the Frenchman took a love set
that lasted only nine minutes.

After the customary rest, Harada
speedily showed that he had recovered
control by winning five games in a
row, without a single error being
charged against him. The three
points that Cochet obtained were all
on net placements. But another streak
of wildness by Harada started the advance of Cochet once more and he
won four games in a row and then
was within a point of tying the score
at 5-all, on Harada's service, but the
Japanese saw his danger just in time
and steadying himself for his most
careful service managed to bring the
score to deuce. Then the battle continued. Cochet had another chance
to tie the score but was outdistanced in
a back-court duel and finally Cochet

the Japanese and the match ended.

INTRUDER WINS Compiles 18 Points for the Three-Day Yacht Series

INDIANAPOLIS, Ind., Aug. 30 (Special)—Walter C, Hagen of Pasadena, Fla., shooting better than par golf on the final 36 holes, won the western open tournament championship here Saturday with a 279 score, which is the lowest ever made to win the championship. Macdonald Smith, Lakeville, (N. C.) Golf Club, who won the tournament last year at Youngstown, O., with a 281, placed fourth this year with 289.

Eugene Sarazen of Flushing, N. Y.

Special from Monitor Bureau

CHICAGO, Aug. 30—Finishing first in all three races, Intruder, the Margorian that the Jackson Park Yacht Club, owned by the three O'Rourke brothers John, James and Edward, captured the Virginia Cup, the unrestricted, "Q" class sailing that the complete of the comple Special from Monitor Burgan

The latter is owned by J. A. Hadwirger, donor of the trophy.

Rough sea with a stiff northeasterly gale was encountered by the contenders in negotiating the 12-mile quadrangular course off Grant Park here yesterday. Intruder finished in 1h. 35m. 26s., with Jackson Park 2d, the title defender, second. Over a 10-mile course Saturday in connection with the Hamilton Club yacht regatta, Intruder led the "Q" Class with the time of 1h. 21m. 33s.

In the regatta Kayoshk 2d, owned by George Fox of the Chicago Yacht Club, won the yawl race; Celeritas, owned by R. A. Price, Columbia Yacht Club, captured the "P" Class sloop prize; Nancy, owned by Samuel Dauchy of the Columbia Yacht Club, won the "Q" Class sloop races, and Columbia of Jackson Park, owned by Harold Redmoa, won in the Seawanhaka sloop contest.

AFTER ANOTHER EASTERN TEAM MADISON, Wis., Aug. 30—The University of Wisconsin's basketball team will engage another eastern five this winter in addition to Syracuse University if the present plans of Coach Walter E, Meanwell and Business Manager George Levis materialize. An effort is being made to bring a strong quintet west to meet the Badgers in Milwaukee during the Christmas holidays. Letters have been dispatched to Princeton, Cornell, Yale, Columbia, Pennsylvania and Dartmouth, and it is practically a certainty that one of these will accept the terms offered. The contest will be held in Milwaukee's largest auditorium, a definite date to be announced later.

RULES FOR WRIGLEY MARATHON RULES FOR WRIGLEY MARATHON.

AVALON, SANTA CATALINA ISLAND, Calif., Aug. 30 (#)—Rules governing the proposed channel swim between
this island and the mainland, to be
officially known as "the Wrigley Ocean
Marathon," were announced here today
by J. H. Patrick, appointed by William
Wrigley Jr., wealthy sponsor of the
swim, as general chairman. Patrick said
the date at which all contestants must
compete had been tentatively set for
Jan. 15, 1927. The swim is open to anyone and in the event of failure of all
contestants any individual may make the
attempt on giving 10 days' notice. The
\$25,000 prize will stand until the swim is
successfully negotiated.

Champion Wins

VIRGINIA CUP Miss Page Captures Women's Western Golf Title From Mrs. Hill, 3 and 2

> Special from Monitor Bureau CHICAGO, Aug. 30—As a result of her first big tournament experience, Miss Dorothy Page, sinewy-17-year old girl from Madison, Wis., is today being acclaimed the champion of the Women's Western Golf Association.
>
> In the final match at Olympia Fields. In the final match at Olympia Fields Country Club here, Saturday, Miss Page, former Western junior cham-pion, defeated Mrs. O. S. Hill of Kansas City, 3 and 2, at 36 holes. At the end of the morning 18 she claimed the advantage 2 up. They drove together most of the

way, their tee shots often lying not 10 feet apart. Mrs. Hill's putting proved superior on a-majority of holes. The champion's margin of victory was The champion's margin of victory was displayed in the iron shots, long seconds and brilliant approaches, often recovering from traps to drop her ball inside the Missourian's position.

In the championship consolation flight, Mrs. David C. Gaut of Memphis, Tenn., former Western champion, defeated Mrs. Lee W. Mida of Butterfield Country Club near here, tourney medalist, 2 up at 18 holes.

field Country Club near here, tourney medalist, 2 up at 18 holes.

Miss Page turned the twenty-seventh hole 3 up against Mrs. Hill, and then won the twenty-eighth when the latter drove into a ditch, an unplayable lie. This put Mrs. Page 4 up, and they halved the next two holes. Mrs. Hill reduced the margin when she sank a chip shot from a trap for an eagle 3 on the thirty-first green. The match ended on the thirty-fourth green when Mrs. Hill, dormie 3, stopped a foot short of the cup with a putt that might have halved the

ENGLISH WOMEN WIN THE OLYMPIC GAMES

GOTHENBURG, Swed., Aug. 30 (A) GOTHENBURG, Swed., Aug. 30 (A)
—At the conclusion of the women's
Olympic Games here, England led with
50 points, France was second with 27
points. The honorary prize of the
Women's International Athletic Federation was awarded to Miss K.
Sitomi of Japan. Miss Sitomi won the
running broad jump with 5.50 meters
(about 18 feet). Miss De Orosley,
Great Britain, won the 1000-meter
walk in 5m. 10s.
These are claimed as world's records These are claimed as world's records

These are calmed as world's for women.

The Congress of the Women's International Athletic Federation has decided to have no more races beyond 200 meters. The next international athletic meet for women will be held at Prague in 1930.

SEVENTY-FIVE CADETS EXPECTED SEVENTY-FIVE CADETS EXPECTED
WEST POINT, N. Y., Aug. 30 (R)—
Head Coach Lawrence Jones expects 75
men to appear Wednesday for the
United States Military Academy first
football practice of the season, he announced today. Jones is serving his first
year at the head of the army candidates.
Facing one of the hardest schedules in
recent years, Coach Jones has proven
material in Hewitt, captain; Wilson,
Trapnell and Harding in the backfield;
Born, Hardold and Davidson, ends, and
Dalys Schmidt, Sea in Saunders, Hammock, Sprague and Elias in the line.

AUSTRALIANS MAKE 201 BRIGHTON, Eng., Aug 30 (P)—The Australian cricket team scored 291 runs for eight wickets Saturday in the first innings of their match with Sussex County. Bardsley, acting captain of the Australians, scored 106, not out.

BOSTON DEFEATS SPRINGFIELD
The Boston Football Club defeated Springfield at Boston, Saturday, 5 to 1.

NARRAGANSETT PIER, R. I., Aug. 30 (P)—The Argentine polo team defeated the Anglo-American team, heré, Saturday, at the Point Judith Polo Club grounds, 7 to 5.

New Fresh-Water Swimming Record

W. C. Jackson Believed to Have Established New Distance Mark

FLOMATON, Ala., Aug. 30 (A)—A world record of fresh-water swimming s believed to have been set by W. C. Tackson of Flomaton yesterday when ne swam 92 miles down the Escambia River in 9h. 33m.

| Jackson, who plans to attempt to

While Jackson was aided by a six-mile current, he was handleapped by the cold, which forced him to abandon

checked the distance.

Jackson attracted notice in this sec-

then coming back with slashing drives along the lines and across court. For the first time since the opening of the tournament, the champion was able to take advantage of ideal court and weather conditions by punctuating his brilliant game with advances into the forecourt. The all-court exhibition Saturday was sound in every depart-

his orilliant game with advances into the forecourt. The all-court exhibition Saturday was sound in every department of play, and Chapin was placed largely on the defensive in the last three sets of the contest.

Although Tilden at no point appeared in danger, Chapin drew frequent outbursts of applicate by his brilliant returns of Tilden's victous drives. His terrific service was almost as effective as the cannon-ball delivery of the champion, but the speed with which tive as the cannon-ball delivery of the champion, but the speed with which he forced the fight at the net in the opening set sapped too much of his energy to enable him to cope successfully with Tilden's masterful stroking in the later sets.

William M. Johnston of California and Dr. George T. King of New York won their semifinal match in the doubles after a brilliant four-set brush with the Pacific Coast pair, Philip F. Neer and James M. Davies. 6-2, 6-3.

Neer and James M. Daviss, 6-2, 6-3

William T. Tilden 2d, Philadelphia, defeated Alfred H. Chapin Jr., Springfield, Mass., 3-6, 6-4, 6-0, 8-6, DOUBLES—Thirds Round Hugh G. M. Kelleher and Francis T. Hunter, New York, defeated John A. Barr Jr., Dallas, Tex., and Willmer Allison, Austin, Tex., 13-11, 6-3.

Semifinal Round

William M. Johnston, San Francisco, and Dr. George T. King, New York, defeated Philip F. Neer, Portland, Ore, and James M. Davies, San Francisco, 6-2, 6-3, 8-10, 6-2.

William T. Tilden 2d, Philadelphia, and Alfred Hr. Chapin Jr., Springfield, Mass., defeated Hugh G. M. Kelleher and Francis T. Hunter, New York, 6-3, 3-6, 6-3, 6-8, 6-1.

Final Round

William T. Tilden 2d, Philadelphia, Semifinal Round

William T. Tilden 2d. Philadelphia, and Alfred H. Chapin Jr.. Springfield, Mass., defeated William M. Johnston, San Francisco, and Dr. George T. King, New York, 6-4, 6-2, 4-6, 6-8, 6-4.

R. T. JONES JR. PLAYS

zen of Flushing. N. Y., who tied with Cooper yesterday, and Macdonald Smith of Grand Rapids, who placed fourth. Jones and Cooper finished the 18 holes 2 up. The Atlanta star was off his game as he did not play any practice rounds.

In the afternoon he paired with Macdonald Smith to meet Walter C. Hagen of Pasadena, Fla., new Western open champion and Sarazen. This match ended even. Jones played better golf and shot a 69, one under par.

COLUMBIA SQUAD CALLED NEW YORK, Aug. 30—Forty men, 19 of them linemen, 14 backs and seven ends, constitute the picked squad that has been ordered to report to Head Coach Charles F. Crowley for the start of the Columbia varsity football practice at Baker Field Sept. 7, a week from tomorrow. The time for reporting has been set just a week later than a year ago, Coach Crowley having decided that his team had had too much football by the time the big games rolled round in 1925. The new arrangement will give him 18 days in which to prepare for the opening game with Vermont on Sept. 25.

NEW BEDFORD CLUB WINS NEW BEDFORD, Aug. 30—The New Bedford Soccer Club defeated Providence here Saturday, 2 to 1. Weakness in front of goal lost the local team a chance to pile up a big score. Providence lost a chance to tie up the game when Florrie missed from the penalty spot at the beginning of the second half.

GRAND AMERICAN GREATEST EVER

Nearly 1,000,000 Targets Thrown for 1150 Trap Shooters

DYTON, O., ug. 30 (Special)-When he swam 92 miles down the Escambia River in 9h. 33m.

Jackson, who plans to attempt to swim the channel to Catalina Island for the \$25,000 prize offered by William Wrigley, entered the water at 6:41 a. m., at the Escambia bridge here and was taken out five miles below Moline, Florida.

While Jackson was aided by a sixmile current, he was handicapped by the cold, which forced him to abandon

his original objective, Pensacola, Fla, which would have taken him more than 100 miles.

He was accompanied by friends from Flomaton and a staff man of the Mobile Register, who timed him and checked the distance.

Five minor events were shot Saturday. Harry Harrison of Rochester, N. Y., won the consolation handicap, Society of From the 19-yard line, C. K. Keifer, Orrville, O.; Leonard Barnosky, Wyandotte, Mich., and Arthur A. Bell, Cleveland, O., tied with nine there at 96 targets and wen second Mobile Register, who timed him and checked the distance.

Jackson attracted notice in this section as a distance swimmer when he swam from Mobile to Fort Morgan, Fla., 44 miles, facing choppy seas and head winds. He plans to try the English Channel next summer.

The longest distance covered by a fresh-water swimmer previous to Jackson's 92 mile achievement yesterday, was that of Miss Lillian Hanison, who swam 78 miles in the river Platte in Argentina.

TILDEN DEFEATS

CHAPIN IN FINAL

Champion Dominates After

First Set in Newport Tennis

NEWPORT, R. I., Aug. 30 (P)—William T. Tilden 2d, United States singles champion, Saturday defeated sirst and solve the distance of the singles champion. Saturday defeated in the shoot-off. The nine other men in this tie were C. A. Galbraith. Bay City, Mich.; H. B. Grenamyer, Piqua. O.; J. W. Goodwin, Elizabethtown. Ky.; S. M. Hudson, Hammond, Ind.; C. B. W. Chapman, Baltimore, Md.; Charles Rimby, Beaver Falls, Pa.; A. M. Perksin, Baton Rouge, La.; H. H. Sergeant, Cincinnati, O.

The amateur championship at doubles was won by Bart Lewis, of Springfield, Ill, breaking 129 targets. W. G. Warre, of Chicago, Ill, was runner-up with 186. Frank M. Troeh, of Portland, Ore., and B. A. Gillespie, Phoenix, Ariz., shot into a tie at 185. In the shoot-off Troeh took third and Gillespie fourth place.

Some excellent shooting was done in the Women's championship dcubles. Atlanta, Ga., came into the limelight again when Mrs. J. C. Wright and Mrs. W. P. Andrews, of that city, won singles champion. Saturday defeated

NEWPORT, R. I., Aug. 30 (AP)—
William T. Tilden 2d, United States singles champion, Saturday defeated Alfred H. Chapin Jr. of Springfield, Mass., in the final round of the Newport invitation tennis tournament, 3—6, 6—4, 6—0, 8—6.

After the initial set, Tilden dominated the play from the back court, jockeying his youthful opponent out of position with a varied attack and then coming back with slashing drives along the lines and across court of the common of the common of the common of the state of the common of the

day captured the women's amateur championship last Tuesday.

The professional doubles championship crown was won by J. R. Jahn of Spirit Lake, Ia., with 189 targets. Kunner-up in this event was Homer Clark East Alton, Ill., scoring 188 hits.

A non-registered event and the closing number on the tournament program the intrnational hundred. program, the intrnational hundred.

HERBERT TROPHY SERIES STARTED

Orange County Defeats Princemere in Fast Polo Game

Neer and James M. Davies, 6-2, 6-3, 8-10, 6-2.
At the same time Hugh G. M. Kelleher and Francis T. Hunter of New York qualified to meet Tilden and Chapin in the other semifinal contest by defeating John A. Barr Jr. and Willmer Allison, Texas entry, 13-11, 8-3.

pauchy of the Columbia by Samuel beeck, won the "Q" Class sloop races, and hey halved the next two holes, Mrs. The hold Redmoa, won in the Sawarshese in the to the end as neither scored in the sev enth while each scored one in the

game with five goals to his credit while Hitchcock and Harry East, No. 2 for Princemere, each scored three. By winning the game Orange County reached the semifinal round where it will meet the winner of today's game between the Meadowbrook-Army and the Roslyn teams. The winner of the semifinal round match will meet the winner of the Argentine-Hurricane game. The summary:

ORANGE COUNTY PRINCEMERE No. 1—W. A. Harriman. F. H. Prince Jr. 2—Thomas Hitchcock Jr. Harry East 3—L. E. Stoddard... Col. P. K. Wise Back—J C. Cowdin... Lord Woodhouse Score—Orange County 9. Princemere 7. Goals—Harriman 5. Hitchcock 3. Stoddard for Orange; East 3, Wise 2, Prince, Handicap for Princemere. Time—Eight 7½-minute chukkers.

MOROCZY STILL HOLDS LEAD

R. T. JONES JR. PLAYS
IN EXHIBITION GOLF
INDIANAPOLIS, Ind., Aug. 30—
Robert T. Jones Jr., of Atlanta; Ga., present United States and British open golf champion, came North to this city to play 36 holes of exhibition golf with four of the stars who played in the Western open tournament, here on the Highland Golf and Country Club links yesterday. He arrived Saturday, accompanied by his father. They journeyed out to the scene of the Western open tourney and watched several hours.

Jones, paired with Harry Cooper of Kansas City, who tied for second in the tournament, played Eugene Samzen of Flushing, N. Y., who tied with Cooper yesterday, and Macdonald Smith of Grand Banids, who nisced.

FORD ENTERS NATIONAL RACES
PHILADELPHIA, Aug. 30 (P)—Henry
Ford has entered his new giant threemotored all-metal monoplane in the national air races which will be held at
Model Farms, in southwest Philadelphia,
Sept. 4 to 11. Sept. 11 it will compete
against other big freight and passenger
carriers in the air transport speed and
efficiency race, which will be flown over
a 12-mile course for a total distance
of 120 miles. Ford's plane will be piloted
by R. S. Schroeder, famous altitude pilot,
and now manager of the Ford airways.

BROCKLYN, Aug. 30—The Brooklyn Wanderers and Bethlehem Steel soccer teams battled to a 3-to-3 draw at Ebets Field Saturday. The Wanderers led at half time by 3 to 2, scored by Burness, Eisenhoffer and Conrad, to which Smith and Stark responded for the Steel Workers. Brooklyn held its lead until 10 minutes from time, when Purvis, who subbed for Schonfeld, converted a corner kb.k.

POWER TUBE IMPORTANCE **EMPHASIZED**

Pure, Strong Tone Output Impossible Unless It Is Used

It is a privilege to offer the fol-lowing discussion, especially pre-pared for this paper by Albert F. Murray, who will be remembered for his excellent treatment of plate. and grid rectification methods. It and grid rectification methods. It should prove for once and all to those who still persist in using in ordinary tube for their output that they are throwing away money, in that their set may cost from \$100 to \$1000, and have the finest audio units built into them, but without the proper output or power tube, purchasable at \$6.50, the entire investment may be said to be yieldvestment may be said to be yield-ing less than 33 per cent of what it

to listen to the same orchestral se- in operation. lection, first on the ordinary type of set, then on a high-quality receiver.
The drums, which you did not think were there, are pleasingly audible, in proper balance with the other in-

To fulfill the demand of low notes and volume without distortion, three factors at the receiver must be right:

factors at the receiver must be right:

(a) The receiver must deliver to the last amplifier tube a sufficiently strong undistorted signal, in which the bass notes are present.

(b) The last amplifier tube must be of the proper type and supplied with the proper voltages to give a sufficiently great undistorted output to the loudspeaker in order that it may produce the desired volume.

(c) The loudspeaker must be able to reproduce with fair uniformity, frequencies from 30 to 5000 cycles; it must reproduce the desired volume without overloading, and it's impedance must be suited to the output circuit of the receiver.

Any good receiver with a high-

Naturally, the first question that arises when a new type of tube is to be tried is: "How bright shall I burn it?" Oftentimes the thought is in the form of "How bright do I dare to burn it?" Since the mistake of using too high a filament voltage or current directly affects the user's pocket-book, this is one variable that he invariably determines with some care. Therefore, some means, either a voitmeter or ammeter, is usually provided to indicate when the tube is

operated at the correct brilliancy.

A voltmeter is the thing to use. It is much more satisfactory than an ammeter. Operators of multi-tube sets using thoriated filament tubes, sets using thoriated filament tubes, 129 or 201A, have found that a voltmeter is almost a necessity, since the use of too high a filament voltage soon makes it necessary to reactivate the tubes. So first, the owner wants to know what his filament voltage should be; next he likes to know the amount of current required so that he can estimate the drain on his filament (or "A") battery.

duried so that he can estimate the drain on his flament (or "A") battery.

Next in importance in operation is the correct plate voltage used with the new regiving tubes. Every set owner knows that you buy plate (or "B") battery in blocks of 22.5 or 45 volts, and he knows that these blocks cost money. Consequently, a high plate voltage often causes some concern, both because of the cost and the bulk. The writer wishes to advise that it is really necessary to use high voltage on the plates to realize improved amplifier or eration. If you use a UX120 with 90 volts on the plate, you might just as well use a 199 tube. For the voltages higher than 157, as used with the UX210, the source of plate power should be some type of A. C. rectifier.

Those who are not interested in the upkeep cost of their receivers need not look at the plate milliamps, column. The others will want to know the amount of plate current taken by the tube so that the total load on the "B" battery may be computed and an idea of the battery's life be formed. If a "B" eliminator is used, the total plate icad should not exceed the rating of the eliminator.

In the case of the 171 and 210

used, the total plate icad should not exceed the rating of the eliminator.

In the case of the 171 and 210 tubes, where a high plate voltage is used and a large plate current flows, it is necessary to keep the D. C. out of the speaker by means of an out-put transformer or to couple the speaker through a 4 MF. condenser after a choke coil of from 10 to 30 henrys has been placed in the plate circuit of the power amplifier tube. See Fig. 2.

Plate Resistance

built excellent receivers, do not have the least idea as to the value of the plate resistance of the tubes they use. A knowledge of this value is necessary in designing the apparatus, or the circuit, with which the tube is to be used. We often wish to fulfill the condition of maximum power output from the tube and this means we ance) of the output circuit equal to the internal tube resistance. An illustration of this is found in the improvement of the W. E. Co. cone loud-

my produce the desired volume.

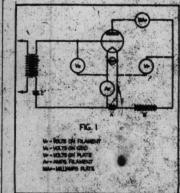

(c) The loudspeaker must be able to reproduce with fair uniform. It was the content of this is found in the internal tube resistance. An illustration of this is found in the passes of the putput, circuit of the receiver.

Any good receiver with a higher plate finpedance such as the R. C. A. Model 104 cone speaker which will fulfill the last requirement; such as the R. C. A. shown in a later paragraph. Mutual Conductance

The simplest way to consider this the capabilities of various amplifier technical sounding term is that it is the numerical value obtained by dividing the plate resistance by the amplification factor. There is only one thing to remember about mutual conductance; that is, it is the measurement of the capabilities of various amplifier tubes. The maximum undistorted milliwatioutput data are probably the most interesting and valuable to the user of amplifying tubes because it shows so clearly what results to expect, when various plate voltages etc. conductance; that is, it is the measure of goodness of an amplifier tube. If the mutual conductance of one tube is twice the value of another. you should expect twice the power of amplification from it. The reason mutual conductance is given in "micromhos," is because the property of a conductance is the oppo site of that of a resistance, and since the well-known unit for the latter is the "ohm," that for the fermer is the "mho" and, of course, a "micromho" is one-thousandth of a mho.

Amplification Factor The numbers in this column show the voltage amplification which the tube gives; that is, if the factor is 8,

t means that if there is an innu it means that if there is an input voltage of 1 volt applied to the grid of the tube, then there will be observed in the output (plate) circuit a potential of eight volts.

The amplification factor depends upon the construction of the tube elements, such as the spacing of the grid, and the distance between filament with and plate.

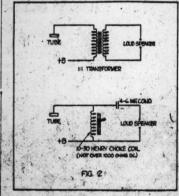

ent, grid and plate.

Maximum Undistorted Output It is only recently that tube manufacturers have furnished radio users with this interesting and helpful information. Radio engineers have realized, of course, that a tube, such as for instance the UX210 which is

as for instance the UX210 which is ratter a choke coil of from 10 to 30 henrys has been pit sed in the plate circuit of the power amplifier tube. See Fig. 2.

Grid Bias Voltage

Two years ago the use of a grid (or "C") battery in a receiver was rather mysterious to the average owner. Now the radio public has come to realize to some extent that

the selection of proper appartus. The mutual conductance is a valuable guide by which to judge and compare

are used.

The radio experimenter is going to be pleased with the improved amplifler operation resulting from the proper use of these new tubes, and that pleasure will be heightened if he has some insight into why he gets better results.

Linemen Put Up Poles Under Great Odds

PERTH. W. Aust. (Special Corre spondence)-A signal pioneering feat has just been performed by workers from the general post office. For 12 months they were engaged in a country where, so far as is known, white man had never penetrated. A new section of the telegraph line was laid between Perth and the far-spreading northwestern Province. The department had found that, owing to the proximity of the old line to the seacoast, the salt air was eating the wire away and reducing conductivity. It was decided, therefore, to erect a telegraph inland for a distance of 175 miles. The route had to be surveyed in desert country, necessitating arrangements for water and other supplies. Shade temperatures up to 120 degrees were experienced, and altogether the achievemnt was a

REAL ESTATE

VANCOUVER. BRITISH COLUMBIA BRITISH COLUMBIA
presents more opportunities for sound real
estate investment than possibly any other
ofty, owing to its immediate prospects and its
assured future. Vancouver's trade and population are both advancing very rapidly and
its strategic position assures a steady growth
for both. Vancouver, being the terminus of
two great transcontinental rallroads, a great
salt water port, open all the year round, the
center of British Columbia's industry and an
unsurpassed climate is a mecca for tourists
and a desirable place for those intending to
establish a permanent home. Real estate
values are at present very moderate, but it is
advisable for intending purchasers to make an
early selection. Forty years' local residence
assures excellent advice on Vancouver properties, and inquiries are invited. J. FREDSANDERS, 438 Robson St., Vancouver, B. U.

HOUSES & APARTMENTS TO LET PORTLAND, ORE. Tale Apartments— Just completed; beautiful two or three rooms, furnished or unfurnished; strictly modern. 782 Lovejoy St. Beacon 9557.

HELP WANTED-WOMEN WB are direct importers of art jewelry and leather novelties and require individual women sales representatives, full or part time, in all communities; prices of goods within the reach of all; consignments of stock sent; no expense incurred; unusally liberal terms offered. E. ERSKINE HILL, 180 West 42nd St., New York.

SERVICE ORGANIZATION requires women of education with an appreciation of fine things, willing to work earnestly: must be interested in permanent position assuring a real future with adequate commissions; opening in nearly every state; sac 25-45. See or write MISS SHEERIER 360 No. Michigan Blvd., Rm. 1004. Chicago, Ill.

EDITORIALS

Recent dispatches from Moscow indicate that a rather important political change is taking

Is Russia Changing Front?

place within the United Socialist Soviet Republics. They have re-Soviets to reorganize and concentrate. the commissariats, to effect economies within the state industries and to

place the business of the country upon a solid financial basis. This program was outlined immediately following the reputed expulsion of certain individuals from the Soviet Party. And the promise has evidently been initiated judging from the subsequent dispatches telling of the shifting and concentration of committee powers. Now the report comes that the Soviets intend to lift the restrictions on the foreign trade of the country, that this will take effect at the end of the calendar year, whereas contracts looking to that end may be entered into two months prior

The export trade of Russia-has been pretty largely controlled by the Soviet Government through state corporations set up especially for that purpose. One of these, for instance, controls the trade between Russia and Germany, another the trade between England and Russia and still another the trade between Russia and the United States. All departments of trade with but a few exceptions are concentrated in the hands of these organizations. The All Russian Textile Syndicate has a separate organization, and some few private corporations have been given a charter to do a limited import and export trade. It is now said that the peasants are showing a dissatisfaction over what they are allowed for their grain and what they must pay for necessities, and it is because of the desire of the Soviet authorities to placate them that the plan has been advanced to lift the ban on the private prosecution of trade with foreign peoples. If this promise is fulfilled then it may very properly be conceded that the Soviets have gone far toward repudiating those Communistic theories which were proclaimed when the Kerensky Government was overthrown.

It is but a step from withdrawing from foreign trade enterprises to withdrawing from domestic trade and industry. If the Soviets find it so difficult to prove the efficiency of state-controlled foreign trade, by the same reason they may expect to find it difficult to demonstrate the efficiency of state-operated domestic trade and industry. As a matter of fact, it would seem that the latter is being experienced, inasmuch as the Government is advertising its determination to effect economies in its own works.

Indeed, one of the very latest reports now current is that the suggestion has been seriously advanced in Moscow of opening up the country to the tourist trade. This would mean the letting down of all restrictions on passports and the expression of a willingness on the part of the Government to admit all foreigners freely to travel throughout the country. Russia undoubtedly has some rather famous museums and other points of interest which would attract tourists. The admission of tourists, of course, would make essential a rapid improvement of train and hotel services together with a development of resorts. It would mean the gradual importation of foreign ideas and a diffusion of knowledge that would promise a radical change in the viewpoint of the Russian. If the Soviets are willing to challenge the world with their ories by such a means, this would be an excellent way in which to do so. And it seems more than likely that, in making such possible, Russia is destined to go through a gradual economic and political metamorphosis.

Perhaps the chief interest in the present general election in Canada is whether one party or the other is going to be

Dominion Election Issues

returned with a majority. In the last Parliament no party had a clear majority over all other groups. The Conservative Party had the largest group, 116 members. The total member-

ship of the House is 245. The Prime Minister has to muster 123 followers to command the confidence of the House of Commons. The Liberal Party numbered 101 members. The remainder consisted of twenty-five Progressives, one Independent Nationalist and two Labor

Until about the last week of the session, the Liberal Administration carried on by co-operating with the Progressive and smaller groups on a legislative program. When the Conserva-tive opposition began to gain recruits from the Progressives, Premier Mackenzie King asked the Governor-General to dissolve Parliament, to call another general election: he maintained that no leader could carry on longer under conditions as they had developed in the House and the Senate. His Excellency refused to grant dissolution. Mr. King resigned as Prime Minister. Arthur Meighen, the Conservative leader, undertook to form a government; and, within three days, Parliament voted no confidence in the new administration. Mr. Meighen consequently advised the Governor-General to dissolve Parlia-ment. His Excellency accepted Mr. Meighen's advice. The new Parliament will be elected on

Sept. 14. In the election campaign the Liberal leader has laid much stress on the constitutional question. It is acknowledged by Mr. King that the Gover-nor-General acted in accordance with an honest conviction. His Excellency regarded himself as an umpire between the parties. He felt that Mr. Meighen should be given a chance to govern before plunging the country into another general election. The Liberal leader's objection is that Baron Byng misapprehended the constitutional duty of the Governor-General under such circumstances. It is maintained that His Excellency should have been guided by the example of the King in Great Britain, who has never once in the last hundred years refused to grant dissolu-tion when advised to do so by the British Prime Minister. The Liberal position is that the rela-

tionship of the Governor-General to the Prime Minister in Canada should be the same as the relationship of the King to the Prime Minister in

The Conservative response in the election campaign has been to treat the constitutional question as of no immediate consequence. Conservative eloquence has been devoted mainly to an indictment of the Liberals for laxity in the administration of the Department of Customs and Excise. Adequate protection and tariff stability are also being stressed as Conservative planks. Although the economic issues afford less opportunity for platform exhortations, they will play a big part in deciding the battle on this occasion, as they have done in previous elec-

Education forms so important a feature in the life of any nation that it is commonly recognized

Improving the . Country Schools

that no effort should be spared to insure that it be raised to the highest possible standard. Hence when the Bureau of Education of the United States reaches the conclusion, as a result of a comprehensive study of

rural schools in every state in the Union, that the rural schools are inadequately equipped and financed in comparison with city schools, and consequently are turning out an "inferior product as far as educational standards are concerned," the fact demands attention. And when, moreover, it intimates that this finding constitutes one of the greatest problems facing the United States in its effort to improve its public education system, it is safe to say that this represents no exaggeration of the situation.

The bureau report states as too well known to need elucidation, that schools in country districts are inferior to city schools in professional management, curricula,-buildings, qualifications of teachers and equipment, and urges that professional management and adequate financing are the two main essentials in overcoming the deficiencies. It adds, moreover, that the public which supports the schools should be informed of their standards, and at the same time calls attention to what, in the opinion of the bureau, is "perhaps the most important movement affecting rural education of the past five years,' namely, "the effort to take its management out of the hands of politically elected officers, state and county, and put it into the hands of professionally trained administrative officers, assisted by a corps of adequately prepared supervisors and teachers.

In thus urging the necessity of eliminating politics from school management and emphasizing the important part which public opinion plays in maintaining a high standard of education, the bureau is without doubt singling out two extremely important facts in the general educational situation. It seems somewhat odd. however, that the bureau should apparently feel that politics plays so important a part in the country schools, when in the large cities of America politics represents a far more active force. Unless public opinion is aroused, the best of reforms is likely to fall flat, and unless politics is eliminated even an aroused public opinion is not likely to accomplish as much as it could otherwise. The responsibility resting upon the country schools is as great as that resting on the city institutions, and the goal of scholastic equality is not only a justifiable one, it is one that the times demand. The real reason for the inferiority of the country'schools is the lack of appreciation by the farmers of the country of the need of education for their children. It is, however, to be welcomed that the bureau is enlarging its scope of co-operation with educational agencies in dealing with the question. No reasonable effort should be spared to insure that the country schools be raised in their standards to a par with those in the larger communities.

Residents of the eastern American cities, who have been hearing alarming reports of the spread of what are termed "radical" views

The Fly on the Chariot Axle

the western states, have as a rule merely a vague idea of the actual conditions that have created widespread discontent in many agricultural regions. The difficulty in understanding the farmer's grievances, or the remedies suggested for them, lies largely in the provincialism of the city dweller, inclined to regard affairs from the viewpoint of his personal interests. It is there-

among the farmers of

farmers should appear to be dangerous radicalism, that may interfere with his interests and profits. There is in reality no more danger of the growth of a farmer sentiment antagonistic to the other great business interests of the United States, than there is of Bolshevism being accepted by American organized labor. The farmers believe that they have not received equal treatment under the laws enacted to benefit manufactures, commerce and transportation, but they have no desire to tear down or to injure the fabric of modern industry. They realize fully that the demand for their products depends very largely upon industrial activity, and that their chief market is among the mil-

lions of factory workers and their families.

There need be no alarm over the prospect that

legislation hostile to legitimate business will be

fore not surprising that to the city manufac-

turer, merchant, or banker the protests of the

promoted by the representatives of agriculture. If an explanation is sought of expressions by some of the western farm leaders, indicating an intention to impose restrictions on certain business activities, it might be found in that city provincialism that ignores the importance of the farmers as a factor in permanent prosperity. An illustration is seen in a recent number of a publication issued by a great metro-politan banking house, in which, under the heading "Four Years of Easy Money" it is submitted that: "For over four years now, to be exact since the beginning of 1922, the speculative security market has not run up against a real tight money market. This remarkable ease in money for the last four and one-half years has been at the bottom of all the prosperity we have been having."

The average Iowa or Kansas farmer, who has a homely notion that the production of the country's food and clothing has something to do with "the prosperity we have been having," including the improved condition of the railways? might be excused if he wonders why the average call rate for loans in the "speculative security market" should be less than 5 per cent, while loans for aiding production of needed farm products should often be twice that rate.

Whatever else men may think about Augustus Cæsar, they must acknowledge the excel-

The Month

Imperial

lence of his taste in selecting the final month of summer as the one sufficiently magnificent to carry off the honor of being named for himself. Prior to his gracious bestowal, the Ro-

mans had designated this royal month merely as the sixth of the year in the primitive calendar, thinking, possibly, this indication of its remoteness from the blustering month-if, indeed, March was ever known to come on the Mediterranean "with wind, and clouds, and changing skies"-was in itself an implication of the signal beauty of summer's latter days.

There is every natural reason for agreeing that this full-blown month is eminently conspicuous in the year's pageant of notables. It is, to begin with, or rather to end with, the last month of summer-at least, it is to Americans, though the British may have quite as good reasons for counting it as the first month of autumn, if, for them, the exhilaration appropriate to autumn appears in August. Yet, there is a certain satisfaction, picturesquely considered, in waiting until the leaves begin to fall in earnest before reckoning autumn as having really begun. Then, too, however persistently popular language in this country or that may settle the matter of season-division, so far at least as practical purposes go, the astronomers, with their knowledge concerning equinox and solstice and various zones, appear to look with favor on the division which marks August as near the end of summertime.

But nature itself, indifferent to classifications and comments and honors, reaches in the northern temperate zone the full tide of growth and fruition in the sovereign month of August. Poising for a time at this high point of florescence, summer then begins preparations to go a-journeying, for spring and summer below the equator must be attended to and brought in due course to flowering and fruitage. And the house that is to be left behind must be set in order. There is much to be done against the return, a few month's hence, from the far southern season's end; and, like the wise housewife, summer "looketh well to the ways of her household, and eateth not the bread of idleness." Myriad seeds are to be prepared, and buds are to be arranged for winter sealing. And because of these preparations, summer "is not afraid of the snow for her household: for all her household are clothed with scarlet. She maketh herself coverings of tapestry; her clothing is silk and purple."

What matters it then that some days in late August are cold and skies are overcast! Summer going a-journeying must perforce take out the traveling veils, and let the furnace fires cool down. In exchange, the amber torches are brought forth, and all the acres are set ablaze with golden lights. The fields and the vacant lots are all aglow with goldenrod, and the small grains and the sheaves pick up the golden flame. The gleaners have followed the corn, and the peach and the melon are in evidence. The heliotrope and the sunflower, following the sun all day, express their fullest floral approval of summer's leave-taking. The petunias give up secrets to the humming birds, and all the leaves of the trees are day by day conveying to the green subtle hints of coming crimson gold; and having prudently guarded her sumptuous gifts, bloom-laden summer has ordered her chariots!

Editorial Notes

Of wider than merely local interest was the tribute paid by the Rev. E. M. Cotton of the Marblehead (Mass.) Unitarian Church in the last of a series of sermons he has preached on the Bible. Nothing, he declared, can compare for a moment with this book in its effect on law. literature, art, home life and the whole fabric of civilization. "The tremendous influence of the Bible on the life of the world cannot be overestimated," he said. "It was the first book to assume the present bound form, previous written records being on parchment rolls. It was the first book Gutenberg, inventor of printing, chose to print. Its effect on English and German law is unquestioned. The King James translation made English literature, and Luther's Bible gave the German language discernment, beauty and stability." To which might fittingly be added Scott's lines in "The Monastery":

Within this awful volume lies The mystery of mysteries! Happiest they of human race, To whom God has granted grace To read, to fear, to hope, to pray, To lift the latch, and force the way: And better had they ne'er been born, Who read to doubt, or read to scorn.

It is the right spirit which was manifested by Dr. Masponsa Anglassell, chief of the Catalan delegation to the European Minorities Congress, being held in Geneva, Swit., when he declared the other day that, notwithstanding the manner in which the Catalonians feel they have been treated by Spain, they have decided not to resort to violence to redress their wrongs. Incidentally, he asserted that Catalonia would always keep her language, literature, and individuality, and called attention to the fact that she had her own Parliament before England had her Magna Charta. Whatever opinions are held as to the Catalan ideals and aims, the fact remains that they are far more likely of realization if the Catalonians maintain this present attitude and seek their justification in peace.

The Valley

"HE Valley" may sound a bit affected to the man from Massachusetts or the woman from California, but to the Virginian it has the naturalness of tradition and custom.

"The Valley" is, of course, the Shenandoah Valley, the Valley of Virginia, or "The Great Valley," the title given by Mary Johnston to her latest historical novel. From the upper waters of the Potomac River, where Maryland, Virginia and West Virginia are joined like a jig-saw puzzle to Staunton, two centuries of American history have been crowded between the bordering mountains. Wars-British, French, Indian, revolutionary, civil-have swept it, and time and nature have restored it.

The Valley served as the nursery for the western pioneer stock, including the family of Abraham Lincoln on its way to Kentucky. Washington was tried out as surveyor and officer in this far western Virginia; Woodrow Wilson was born in the Valley, and his father's manse is still the manse of the First Presbyterian Church in Staunton.

As a panorama, the Valley has variety and continuity.

The ranges to east and to west, Blue Ridge and Allegheny are broken here and there into minor ridges, such as the lovely Massanutten, so that one sees them advancing and retreating, here jagged, there rounded, most often with a thin blue veil over them, but now and then amethyst or violet, with a succession of green, misty gray or dark slate as the clouds piled above them shift.

In between, cultivated, gracious fields run as far up the mountain sides as they dare. If one craves the spectacular, there are vast caverns under the earth, far up beyond Lexington a Natural Bridge that ranks as one of the "Wonders of the World," and "Natural Chimneys" near Staunton. + + +

With the building of smooth roads and the ubiquity of the automobile, tourists have been let loose by the thousand in the Valley. Most of the houses along the pike and other thoroughfares have hung out bids-"rooms and meals for tourists"; "room and bath for tourists"; "heated rooms for tourists," the last notice evidently designed for other days than August, the touring season being long. No one on the road need have misgivings about being stranded. In the lowliest vale and on the bleakest mountain side he will find room and board.

While one, Louis Michelle, is said to have discovered the Valley in 1707 and made a map of it, the first official discovery was that made by Gov. Alexander Spotswood and his Knights of the Golden Horseshoe in 1715, when, standing on the crest of the Blue Ridge, he took possession of all the land in sight in the name of the King. Not only was it the Valley, indeed, that he thus took over, but also the western mountains, the Alleghenies, saying: "Some day we'll top these mountains, too, and see what's beyond them. But now, it's the Valley, and that's enough for

The King in England began to grant vast tracts of unseen land, the grantees being required to find enough disaffected or land-hungry persons willing to adventure beyond the Blue Ridge. Many Scots and Ulstermen came up the James as far as possible by boat, going thence on foot and by horse to the wilderness of the upper valley. (The northern tourist speaks of going down the Valley because he goes southward, but the southern part is the upper valley and the northern part the lower.)

From Pennsylvania came men driven from the Rhineland by persistent wars and persecutions, with a considerable number of Scots and English who had found the best of the land in Pennsylvania pre-empted. Joist Hite, the old "German baron," as he was called, was the first to bring a company into the lower valleys including his married sons and daughters and their families and seventeen additional families. He took up land which brought him into lifelong litigation with Lord Fairfax.

The traveler through the Valley today passes three former estates of the Hites, a beautiful old stone mansion with the initials of Hite's oldest son and the date cut in a gable, situated a few miles south of Winchester. Farther up the Valley is Belle Grove, home of a Hite who married the sister of President Madison. This was

used as army headquarters when the battle of Cedar Creek was fought. Across the road, but unseen from it, was a Hite house, Longmeadow, in which there was a large "travelers' hall" for the accommodation of those who came up the river.

Sometimes the Pennsylvanians pushed away from the main track, but they always followed a stream, as did Peter Ruffner, who in 1759 built on the Hawksbill a large brick house, occupied by a descendant. The land, how-ever, was sold as succeeding generations pushed west, and after all of it had gone from possession of the first white owners, the famous Luray caverns were discovered beneath the land. These were the first of the many caverns discovered, and still being discovered, which have proved so much more remunerative than the agriculture or milling

of the early settlers.

John Lewis, an Ulsterman, settled a large tract, and members of his family contributed to the development of

In Miss Johnston's book the pioneers dreamed of days when there should be near neighbors, fenced farms and comfortable homesteads. One closes the book and looks around to see how far realization has outrun hope. Prosperity lies in the Valley, in the broad fields of heavy corn, in the threshed grain, in the ripening orchards where trees bend to the ground with their colorful load, in buildings ranging from modern bungalows to ante bellum mansions. There are few Negro shacks, as slavery never gained much foothold in the Valley.

The foreigner is not conspicuous. There are German names a-plenty, but mostly descendants of men who settled in the Valley before the revolution, having no more familiarity with the German language than their neighbors of English and Scottish extraction with whom they are intermarried.

Churches along the way are largely Methodist, Presbyterian and Baptist. There are some Lutheran and Reformed churches, and the Episcopal church is represented in certain sections. One rarely sees a Roman Catholic church outside the cities, and only recently has a synagogue appeared, even in the city.

In many ways the feeling of the Valley is that of the middle West. If one is familiar with Ohio, he would be at home here, except for the mountains. This is partly because the Valley was continually sending its sons and daughters into Ohio and Kentucky and other states beyond the mountains. Also, the Valley is still in the making, alert, energetic, enterprising, industrious, resting neither on its past nor its present. Something of the brag and bustle of the far West and of the new South has come into the Valley, although there is still the conservatism of those whose faith is in the soil.

There are no deserted farms, no empty houses. The country is trying co-operative methods and the cities are loing the booming. Take the apple. It is produced by thousands of orchards, but one might suppose that Winchester was the sole proprietor. It holds a widely advertised festival in blossoming time and blows a triumphant blast when the fruit is harvested. An enormous red apple in the yard of the Elks' Club is a souvenir of last year's float. One eats at a red apple restaurant and sleeps in a room decorated with apples. Winchester is

prosperous.

Among the gifts that have been thrust upon her is the Handley Library, the donor having neither been born nor lived in Winchester. He just liked it. His benefaction has also provided a fine trade school. The library, ornate without, is charming within, and has, among other attractions, a flag that formerly flew over the Guild House in Winchester, Eng., and which, because it liked some of the American boys quartered over there during the war, it sent to Winchester in Virginia.

This lively little city is the home town of Gov. Harry Byrd and of Lieutenant-Commander R. E. Byrd, and is prepared for future honors:

With motorists running all over the Valley now, what will it be like when the Shenandoah National Park, sanctioned by the Government, becomes available, throwing open vast areas of mountain-land to the Nation? Some Virginians do not like the idea. But that is another story.

The Week in Geneva

N AUGUST 1 the Swiss celebrated their national festival. It is their July 4, so to speak, when the houses are decorated with bunting and flowers and patriotic processions are the order of the day. This year the national festival falling on a Sunday, the churches played more than their usual part in the celebration. In every church sermons were preached extolling the idea of unity and peace for which the Swiss Confederation stands. The festival this time was made the occasion for an act of national charity by associating it with an appeal for the necessitous mothers of Switzefland. A special medal was struck and sold for a franc or less, the proceeds to be devoted to providing comforts for deserving women in their homes.

The representative of The Christian Science Monitor, who was staying at St. Cergue in the mountains above Geneva, was disappointed not to see more of the national costumes among the people who flocked into the village for this-celebration. But in the evening there was a torchlight procession to the ruins of the old Château above the village, where a bonfire was lighted and rockets were sent up. Everyone in the crowd had a Chinese lantern, and the descent of the procession to the village, with the lights twinkling among the trees, was very picturesque. Then came the great event of the day when the Mayor of the Commune delivered a public harangue from the steps of the village hall and spoke with great fervor of the virtue of patriotism. The proceedings closed with the singing of + + +

It is important to remember that when you leave France for Switzerland, or indeed any other country, you must declare the amount of money which you are taking with you. It does not matter what the currency is, whether it s French, British or American. Every bit must be declared and no more than 5000 French francs may be taken out of France, although no restriction applies to other money. How necessary it is to remember this, a story of what happened to a French lady's maid may serve as a warning.

This woman had been to see her parents in Brittany.

and had taken all her savings, amounting to 5000 French francs and \$1500, to buy a house for her mother. The house, however, was not bought, and the girl returned to the French frontier with the money concealed on her person. Whether from ignorance or fright, she failed to say anything about this, and when asked what money she had she opened her purse and showed only 100 Swiss francs. But something in her manner made the official sus-picious and she was taken to a room and searched by a woman attendant. The result was that the money was discovered, the whole of it being confiscated except the 100 Swiss francs which she had declared. She was subse-

Swiss francs which she had declared. She was subsequently allowed 20 per cent of the remainder, and may hope ultimately to get back the full amount with the deduction of \$350 as a fine.

But there are piles of notes in the safe at the frontier which have been confiscated and not yet returned to their owners. The annoying part about it all from the French girl's point of view is that she could have crossed the frontier with her savings intact if she had only declared them.

If Swiss trade is any index of the state of trade generally, then the falling off in Swiss exports and imports for the last six months is a serious matter. For it is a reflection of a general trade depression which, instead of improving, seems to be growing steadily worse. The result is no doubt partly accounted for by what may be hoped

GENEVA | to be a passing phenomenon, the coal strike in Englar But the reimposition of the British tariff on clocks, watches and musical instruments has also contributed to the decline of Swiss exports to Great Britain, which are down by one-half as compared with the first six months of the year 1925. Germany, with which Switzerland contracted a commercial treaty recently, and on which the Swiss exporter set his hope when the mark was stabilized, has bought forty per cent less of Swiss goods in the same period. In France the fall of the exchange has also hit Swiss trade severely, for with the diminished value of their franc, the French are buying less in the way of luxuries from abroad. It is only with the United States that Switzerland can boast of doing better business, but the increased sale of Swiss goods in the American market has not made up for the decrease of Swiss trade elsewhere. All this shows how greatly the prosperity of a country depends on that of its neighbors and on free access to its nearest markets.

The decline in Swiss trade also contains a moral for those countries which hesitate to stabilize their exchanges. for since all trade is an exchange of goods, the falling off in their imports must necessarily be reflected in a diminution of their exports. It is true that stabilization is an unpleasant process which by causing a rise in prices renders foreign trade more difficult for a time. But countries like England and Germany which have had the courage to place their currency on a sound basis will ultimately—given relief from strikes and lockouts—regain their purchasing power and recover their foreign trade, provided they do not hamper it by putting up tariffs.

The Liquor Situation in Canada

To the Editor of THE CHRISTIAN SCIENCE MONITOR: In a letter to me Ben H. Spencer, director of the Canadian Prohibition Bureau, after expressing a high opinion of the Monitor's articles on the Canadian situation, says:

The writer of an article in the Monitor of Aug. 6 makes

The writer of an article in the Monitor of Aug. 6 makes two very excusable mistakes by stating what obviously ought to be as being what actually is. He intimates that Ontario had voted for the sale of 4.4 beer as a moderate measure. In a democracy such as Canada, it is quite natural to assume that the will of the people would prevail. In this case, however, 4.4 beer was forced upon the people by the present Government without their ever having expressed an opinion in favor of it but indeed immediately after they had pronounced against any amendment to or modification of the Ontario Temperance Act. For 4.4, farcical and nasty as it is, the people are not responsible. The government alone must take the blame.

The other error is in assuming that in our prohibition provinces the manufacture also would be prohibited. The fact is that in this prohibition Province of Ontario there are six distilleries and twenty-seven breweries operating under federal permission. Under our Canadian system of government, the provinces can only deal with transactions in liquor which begin and end within the Province. The Federal Government has jurisdiction over manufacture, importation, exportation and interprovincial shipment and sale. One reason why Canadian prohibitory laws are not more successful is this limited power possessed by the provinces of the failure by the Dominion Parliament to enact needed legislation. Thus, provincial prohibitions are to some extent made ineffective by federal permissions. It is the federal permissions, not the provincial prohibitions that are responsible for the amount of law violation that prevails.
